Maturity Business Models for Manufacturing in the Digital Age Bożena Gajdzik, Magdalena Jaciow, Radosław Wolniak, Robert Wolny, 2025-02-28 The

book primarily focuses on the process of industrial transformation in the era of digitalization. It meticulously discusses the processes, technologies, and business models that delineate modern industrial landscapes. A business maturity model is a tool used in organizations to assess how advanced their processes, systems, and procedures are. This model is utilized to identify areas that might require improvements and then to measure progress in these improvements. The goal is to achieve maturity, meaning the organization has well-defined, measurable, and repeatable processes. The first chapter traces the evolution of the manufacturing sector, emphasizing the shift toward digitalization and automation while considering historical context and future trends. The second chapter examines business maturity models, reviewing current approaches and arguing for a broader perspective that includes environmental and social considerations. Chapter three introduces a research model for assessing the maturity of Polish manufacturing companies, detailing the methodology and research instruments used. The fourth chapter presents case studies from Polish industries: automotive, steel, and food, providing practical insights into the application of maturity models in real-world scenarios.

Convergence of Digitalization, Innovation, and Sustainable Development in Business Erturk, Alper, Colbran, Stephen Edward, Coşkun, Erman, Theofanidis, Faidon, Abidi, Oualid, 2024-02-07. In today's business landscape, a pressing challenge looms large: the harmonious integration of digitalization, innovation, and sustainable development. As organizations grapple with the dizzying pace of digital transformation, they also confront the imperative of sustainability. Yet the synergy between these two crucial facets remains uncharted territory, leaving a void in both academic discourse and practical application. **Convergence of Digitalization, Innovation, and Sustainable Development in Business** emerges as the much-needed solution to the complex interplay of digitalization, innovation, and sustainable development. Drawing from the insights of leading scholars and practitioners convened at the International Conference on Digitalization, Innovations, and Sustainable Development, this book offers a meticulously curated selection of papers that illuminate the path forward. For university professors, researchers, students, and industry practitioners, this book is an indispensable resource. It offers a multifaceted exploration of the intersection between digitalization and sustainable development, empowering organizations with a diverse array of digital, innovative solutions and strategies. With topics spanning sustainable supply chain management, renewable energy innovations, smart cities, sustainable finance, and more, this book is poised to make a profound impact on academia and real-world decision-making processes.

Engineering Management Ching Ming Chang, 2005. This easy-to-read book prepares engineers to fulfill their managerial responsibilities, acquire useful business perspectives, and take on the much-needed leadership roles to meet the challenges in the new millennium. The book is organized in three parts: Part I reviews the basic functions of engineering management; Part II provides backgrounds in cost accounting, financial analysis, financial management, and marketing management; and Part III readies the reader for exercising leadership in managing technologies through discussions related to engineers as managers, leaders, ethics, web-based tools, globalization, and engineering management in the decades to come.
