Green Business Process Management. Usage of Existing and New Tools for Achieving the Ecological Goals Melih Aracli,2019-11-08 Seminar paper from the year 2018 in the subject Computer Science Commercial Information Technology grade 2 3 University of M nster language English abstract The aim of this work is to find relevant approaches of Green Business Process Management BPM and analyse them with regard to their purpose It was considered whether the approaches are extensions of the traditional BPM concepts adapted to the ecological dimension or if they are newer techniques and tools introduced by the rise of Green Information Systems IS In order to achieve this goal the basic concept of BPM and its way towards more sustainability is presented at the beginning followed by the explanation of current approaches Afterwards the BPM Lifecycle which serves as a suitable framework to allocate the different tools and techniques is introduced Based on the rough presentation the main part deals more intensively and in more detail with the tools and

techniques of Green BPM approaches These tools and techniques were mapped into an adapted Green BPM Lifecycle so that relevant implications could be derived in the discussion section But first the mentioned tools and techniques are classified according their field of acting Finally the discussion part takes place where the major contributions are analysed and interpreted according to the observed results and background knowledge Companies have been looking at sustainability for several decades recognizing that by reducing pollution they can also maximize their profits Thus sustainability in the field of Information Systems IS is becoming increasingly important as topics like Green IS and IT are addressed These deal with the reduction of IT consumption and emissions because of the implementation of more sustainable business activities However this raises the requirement for approaches in the field of Business Process Management Research and practice lacked an appropriate approach to connect these two areas of Green IS and BPM which is why the notion of Green Business Process Management was introduced Experts are developing instruments and techniques whose primary objective is to integrate sustainability into the different phases of the business process Lifecycle so that more ecological processes can be realized Such approaches help organizations in defining their optimal business strategies regarding the four dimensions of time quality flexibility cost and now adding the aspect of environment

Chang, 2005-09-09 With a focus on strategy and implementation James Chang discusses business management practices and the technology that enables them He analyzes the history of process management practices and demonstrates that BPM practices are a synthesis of radical change and continuous change practices The book is relevant to both business and IT professionals who are presented with an integrated view on how various management practices merge into BPM This volume describes the many technologies that converge to form a Business Process Management System BPMS illustrating its standards and service oriented architecture About the Author James Chang is the founder and president of Ivy Consultants Inc He has extensive experience implementing Enterprise Resource Planning ERP enabled business solutions and process centric integration solutions for Fortune 500 companies Mr Chang has written several articles on BPM and EAI He graduated cum laude with a Bachelor of Science degree in operations research and industrial engineering from Cornell University

**Risk**, 2003 **Operations Management** Steven A. Melnyk, David R. Denzler, 1996 The value driven approach to operations management reaches beyond TQM which is limited by its focus on turning out quality products to thinking in terms of building systems that respond to the changing needs of customers rather than simply building products at the lowest possible cost This text is not structured around the traditional elements of planning organizing controlling and feedback but rather around the concepts and practicalities that form the new approach
