Mockler, 1999-07-09

*Multinational Strategic Alliances* Robert J Mockler St John s University New York Strategic alliances are one of the most significant tools used today in business especially by multinational firms It is seen by business managers as the way to grow their organizations especially when faced by downsizing and cutbacks Such alliances have certainly been around for a long time and surveys show that today the majority of large organizations use them Almost all multinational firms have considered them However what has changed in today s working climate is their breadth and frequency of use and their complexity This highlights the need for a comprehensive guide such as this Indeed research shows that over 70% of strategic alliances fail to deliver the results that were intended from the outset What makes this book so useful is that it covers a broader range of alliances and has more current case studies than other books currently available In addition this comprehensive introduction to the subject provides a base of practical how to do it material and specific decision models covering determining strategic fit negotiating strategic alliances and selecting compatible partners formulating type and structure of alliances in light of operational fit and making strategic alliances work The book also explores other options instead of alliances such as wholly owned multinational expansion and exporting and has major sections on understanding and managing cross cultural diversity communications and leadership Case studies include General Motors in China British Airways and American Airlines Airbus Industrie a cellular phone venture in Tashkent British Petroleum Mobil in Europe and Puyi Briggs and Stratton Engine Corporation in China The systematic processes contingency frameworks best practices guidelines and situation analysis checklists given in this book make it an indispensable guide for managers and senior managers no matter what the size of their enterprise especially those involved in international marketing planning and management It is also relevant to consultants and MBA and post graduate students interested in the development management and other strategic issues involved in multinational strategic alliances **CBI Series in Practical Strategy, Strategic Market Planning** Patrick McNamee, 1998-08-04 Strategic Market Planning A Blueprint for Success Patrick McNamee University of Ulster UK Why is it that there are some firms that are enduringly successful showing year after year results that are superior to rivals Why is it that such firms are not confined to certain industries or certain locations or are of a certain size This book asserts that

remarkably successful firms are not so because of luck or exceptional circumstances but rather such firms succeed for two reasons the drive and strategic vision of their managers and they follow strategic rules which confer success The title of this book reflects its purpose to persuade managers that enduringly successful firms are those that understand most clearly and then serve most effectively the markets they address Consequently the book provides managers with a practical step by step blueprint which will enable them to develop and implement strategies which will make their firms enduringly successful The book asserts that successful firms become so not because of lucky industrial circumstances but because of the drive and strategic vision of their managers This is good news for managers as it means that being in a relatively poor industry is not a sentence to a dismal career informed managerial effort can overcome such problems Additionally an underlying philosophy of the book is that the most effective strategies for all firms are those which are developed and implemented by the managers themselves and not by outside advisers Consequently the book provides a blueprint for any manager in any firm to develop and implement a strategic market plan Strategic Market Planning reflects the experiences which the author has working closely with managers in many industries ranging from banking to retailing to aircraft manufacturing in varied European locations Consequently the book is written in a register of clear language which should appeal to managers and students of business
