CRC Handbook of Coastal Processes and Erosion C.R.C. Handbook of Coastal Processes and Erosion Paul D. Komar, 1983

*CRC Handbook of Coastal Processes and Erosion* Paul D. Komar, 1983      *Hdbk Coastal Processes & Erosion* Paul D.

Komar, 1983-12-20 The objective of this book is to focus on the physical processes that cause coastal erosion Many scientists and engineers have focused their research on the entire range of physical processes from the waves and the currents in the nearshore to the response of the beach via sand transport resulting in a changing coastal morphology Of these many processes this book focuses only on those which directly relate the generation of coastal erosion Some chapters deal exclusively with the physical processes while others provide examples of erosion problems although most of the chapter topics have clear implications for issues of coastal zone management these issues are not belaboured as several other books are already available in this area The objective is to provide state of the art presentation of the science of coastal erosion processes

**Practical Handbook of Marine Science** Michael J. Kennish, 1994-05-19 Some 90% of the Second Edition consists of new information which is reason enough to buy it even if you own the First Edition Here s a sample of the astounding amount of new information you ll find in this latest edition

**Coastal Problems** Heather Viles, 2014-02-25 As coastal populations burgeon problems of erosion pollution and coastal change are becoming ever more serious and necessitate scientifically informed management strategies This authoritative new study discusses the causes of and possible solutions to some of the more pressing problems at the coast against a background of the natural geomorphological and ecological workings of coastal environments A holistic approach to the understanding of coastal problems is suggested which integrates geomorphology ecology and society through a consideration of the basic processes at work Coastal problems are caused by both human and natural impacts often working in conjunction with each other thus drawing on their wide experience of temperate and tropical coasts the authors consider all types of coastal problems ranging from those produced entirely naturally to those where the human impact dominates Extensive use is made of case studies drawn from around the world from beach erosion along the Nigerian coast to the recovery of the Vietnamese mangroves from war damage A major theme of the book is that given recent downgrading of predictions of future sea level rise it is the distinctive geomorphological ecological and societal aspects of each coast which are the vital factors Coastal Problems brings together material vital to any attempts to understand and manage our coasts and will be of interest to all those concerned with the environment and its management

Petroleum Sedimentology Winfried Zimmerle, H. Zimmerle, 1995-04-30 Knowledge of the principles and methods of petroleum sedimentology is essential for oil and gas exploration and exploitation This book is designed as an introductory text for students in petroleum geology and applied sedimentology as well as a useful companion for advanced technicians explorationists geophysicists and petroleum engineers Source rock lithology and type of trap define the quality of a hydrocarbon accumulation This interrelationship is exemplified by seven case histories worldwide NW Europe

Saudi Arabia U S A Mexico CIS China Moreover successful exploitation and enhanced oil recovery often depend on an adequate knowledge of the sedimentology of a reservoir Photographs illustrate macroscopic and microscopic aspects of source rocks as well as reservoir sandstones and limestones that are most important for hydrocarbon exploration A comprehensive list of references encourages further study *Technical Report CERC*, 1983 Coasts C. D. Woodroffe, 2002 Coasts are some of the most rapidly changing places on earth Understanding the natural adjustments that occur between coastal landforms and the processes that influence them is essential for the better management of coastal resources Coasts provides a necessary background in geomorphology for those studying coastal systems It describes the landforms that occur on the coast their responses to the processes that shape them and the pattern of evolution that can be determined for different types of coast over thousands of years Numerous examples from around the world are used to illustrate the variety of environments Particular attention is paid to coastal morphodynamics the co adjustment of process and form on rocky reef sandy deltaic estuarine and muddy coasts This valuable text for advanced undergraduate and graduate students is well illustrated and contains an extensive reference section It will also be of great interest to environmental scientists geologists coastal managers and planners HDBK GEOPHYSICAL EXPLORATION AT SEA Richard A. Short, 1999 A highly readable book on the nature of beaches including the dynamics of the shoreface surf swash and backbeach and globally at the regional variations in beach systems from the tropics to the poles The beach and adjacent shoreface are the most dynamic part of the Earth's surface They represent a narrow zone where waves tides and winds continuously interact producing wherever sediment is available hundreds of thousands of kilometres of beach systems Beaches are also the focus of intense pressure from users and developers and for

these reasons alone a knowledge of beach systems and their morphodynamics is critical to their sustainable management. This book is the first to provide an in depth and holistic view of beach systems looking both in detail at the different beach zones and globally at range of parameters influencing regional variation. It examines the relationship between beaches and ancillary dune systems and includes chapters on beach ecology, safety, stratification and barrier evolution. The book is designed for use in the classroom and the office being aimed at university level students and coastal professionals.
