Oberste-Vorth, Aristides Mouzakis, Bonita A. Lawrence, 2020-02-20 A Bridge to Abstract Mathematics will prepare the mathematical novice to explore the universe of abstract mathematics Mathematics is a science that concerns theorems that must be proved within the constraints of a logical system of axioms and definitions rather than theories that must be tested revised and retested Readers will learn how to read mathematics beyond popular computational calculus courses Moreover readers will learn how to construct their own proofs The book is intended as the primary text for an introductory course in proving theorems as well as for self study or as a reference Throughout the text some pieces usually proofs are left as exercises Part V gives hints to help students find good approaches to the exercises Part I introduces the language of

mathematics and the methods of proof The mathematical content of Parts II through IV were chosen so as not to seriously overlap the standard mathematics major In Part II students study sets functions equivalence and order relations and cardinality Part III concerns algebra The goal is to prove that the real numbers form the unique up to isomorphism ordered field with the least upper bound In the process we construct the real numbers starting with the natural numbers Students will be prepared for an abstract linear algebra or modern algebra course Part IV studies analysis Continuity and differentiation are considered in the context of time scales nonempty closed subsets of the real numbers Students will be prepared for advanced calculus and general topology courses There is a lot of room for instructors to skip and choose topics from among those that are presented
