acknowledge higher education's possible contribution to these problems or the role that it might play in alleviating them. Colleges and universities provide rich opportunities for developing leaders through the curriculum and co-curriculum. Co-curricular experiences not only support and augment the students' formal classroom and curricular experience but can also create powerful learning opportunities for leadership development through collaborative group projects that serve the institution or the community. These projects can be implemented through service learning, residential living, community work, and student organizations. In the first section, Alexander W. Astin and Helen S. Astin, two of the most influential authors in education and co-principal investigators for the research team that devised the Social Change Model of Leadership Development, share their insights on the model they helped create. Also in this section, other leading theoreticians offer provocative and challenging insights into non-hierarchical leadership. The second section features case studies and other examples from the practical realm. Contributions come from a wide array of programs and institutions, from community colleges to Ivy League institutions to urban public universities. Because campuses are increasingly diverse, leadership programs must not only acknowledge but embrace the multiplicity of identities personified in their students. Accordingly, the next section offers essays and case studies on complex issues of intersection of leadership and identity. The book concludes with two chapters essential for those seeking to access leadership development: one focusing on the need for assessment, the other containing an account of the first ever instrument designed specifically to assess non-hierarchical leadership, written by the creator of this instrument.

**Cultural Competence for Public Managers** Espiridion Borrego, Richard Greggory Johnson III, 2017-09-25

Our increasingly globalized society demands a higher level of sophistication when working cross-culturally and internationally in local, state, and federal governments, tribal corporations, and nonprofit organizations. *Cultural Competence for Public Managers* offers guidance on how to become a leader in developing cultural competence in your organization. It provides a conceptual foundation and successful examples for developing cultural competence, including competencies for international collaborations. The authors clearly define terms and provide their own cultural competence model that will add significantly to the current field. They describe the rapidly changing worldwide demographics that are bringing new cultures into many countries and societies. They also examine the issues that culturally diverse landscapes create in the United States, Asia, Europe, Africa, and Latin America, highlighting the differences between assimilationist and the multicultural viewpoints. Drawing on a wide range of examples from universities, local, state, and federal governments, health care service providers, and nonprofit organizations, the book illustrates management practices that are then extended into the relevant cultural context. It also includes examples of cultural missteps and cultural competencies that have worked in practice. Written in an accessible format and style, the book provides practical and useful standards and performance measures, proven coaching and mentoring guides, as well as templates, checklists, exercises, and guidelines. It includes downloadable resources with coaching guides, checklists. Organized thematically, the book defines the scope of cultural competencies, highlights best practices, and describes

variations in responsibility for administering cultural competence for executives managers supervisors and employees
