

Creating culture change

Few people really understand the dynamics of creating a positive and strong organisational culture that supports and enables a business to achieve its objectives. Central to success for any organisation is focusing on building and shaping a resilient culture where engagement, ideologies and continuous improvement are the tools to deliver superior performance.

In how many contexts have you heard the phrase 'the culture has to change'? In recent years we have heard it in the context of the worldwide banking crisis, the British HPI expenses scandal, the recent exposures in the press with the News of the World and other media, investigations into the police and failing NHS trusts, as well as poor performance in our educational system. It seems that the cultures that operate in many of our institutions and business organisations are not fit for purpose. Remedial action needs to be taken.

Before we embark on that mission, it might be a good idea to clarify what organisational culture actually is and how it can be built, shaped, installed and nurtured. There is much confusion about organisational culture and how to change it for the better.

What is corporate culture and how important is it?

So, what is culture? It is the infrastructure, the glue that binds together people and processes to generate results. The culture maps, tangible, processes and activities that permeate the organisation and that should be geared to improved performance. The culture should become the major force that propels the organisation onward.

I spend most of my working life consulting with clients around how to diagnose their current organisational culture, assess how and where it may be failing their business, and shape, create and implement a new business culture that clearly meets the business plan and vision for the future. The culture is founded upon a simple model of the Cultural iceberg, which evolved from my book *The Iceberg Agenda*, which details and documents the core components of developing a high performance business culture – see Figure 1.

Most organisations focus on changing those elements of the iceberg that are easily visible (above water, using the iceberg analogy), which has little impact on performance. Tinkering with
