Creating Knowledge Strengthening Nations is a crucial addition to the debate on the future of higher education **Creating Knowledge, Strengthen Nations** Glen A. Jones, 2005-04-01 Editors Glen A Jones Patricia L McCarney and Michael L Skolnik have brought together a diverse group of contributors to describe how internal and external forces arising from globalization are exerting pressure to change the role of higher education in society and how universities are dealing with these pressures *Knowledge Matters* Diana Rhoten, Craig Calhoun, 2011-02-21 Higher education can be a vital public good providing opportunities for students informed citizens for democracy and knowledge to improve the human condition Yet public investment in universities is widely being cut often because public purposes are neglected while private benefits dominate In this collection international scholars confront the realities of higher education and the future of its public and private agenda Their perspectives illuminate the trajectory of education in the twenty first century and the continuing importance of the university s public mission Reporting from Asia Africa Europe Latin America and North America these scholars look at the different ways universities struggle to serve public and private agendas Contributors examine the implications of changes in funding sources as well as amounts different administrative and policy decisions and the significance of various approaches to assessment and evaluation They ask whether wider student access has in fact resulted in social mobility whether more scientific research can be treated as an open access resource how changes in academic publishing change access to knowledge and whether universities get full value from research sold to private corporations At the same time these chapters capture the confusion in the university sector over explaining academic work to a broader public and prioritizing its multiple purposes Authors examine these practical challenges and the implications of different approaches in different contexts **Educational Research and Innovation Higher Education to 2030, Volume 2, Globalisation** OECD, 2009-11-18 This book examines what challenges and opportunities globalisation is bringing to higher education and as a consequence how education might look in the future **Serving Higher Purposes** Ihron Rensburg, 2020-11-05 Universities of the 21st century and beyond must be about teaching learning research excellence creativity and innovation as much as they must be about enabling the destiny of students communities and nations to realize their potential UJ succeeded in her vision and responsibilities to transform the divisions prejudices and limitations that often restrain the advancement of society The story of UJ s transition to an inclusive diverse dynamic bold and purposeful institution of learning demands to be read by everyone South African African and beyond It is a story of how to be an object rather than the subject of history while dynamically shaping our shared futures laying a solid foundation for future generations to be advocates and architects for social change and cohesion It is a story of courageous and visionary leadership The book offers our nation profound lessons in leadership that should enrich all our efforts to transform institutions in a
