Creation And Last Things At The Intersection Of Theology And Science:

Creation and Last Things Gregory S. Cootsona, 2002-01-01 In this well written and concise volume Gregory Cootsona explores the doctrines of creation and eschatology the end of days in light of contemporary science He addresses what the relationship is between creation in the beginning and the new creation at the end of time how the doctrine of creation informs our lives as Christians and how we grow in faith and love in light of these doctrines The Foundations of Christian Faith series enables readers to learn about contemporary theology in ways that are clear enjoyable and meaningful It examines the doctrines of the Christian faith and stimulates readers not only to think more deeply about their faith but also to understand it in relation to contemporary challenges and questions Individuals and study groups alike will find these guides invaluable in their search for depth and integrity in their Christian faith *Adult Study Guide* Charles Wiley, 2004

Mere Science and Christian Faith Greg Cootsona, 2018-03-13 Emerging adults want to believe that science and faith can coexist peacefully and Greg Cootsona argues that they can In his book Mere Science and Christian Faith he holds out a vision for the integration of science and faith and how it can lead us more deeply into the conversations that confront the church today *One World Or Many?* Richard Tiplady, 2003 This book considers in detail the key drivers of globalization its contemporary shape and its implications for world mission It also looks at the impact of globalization on different contemporary issues affecting mission such as ethnicity the environment and global health as well as globalization's effect on more traditional missionary questions of the world religions contextualization theology and the church One World or Many is written by a variety of authors from all over the world **C. S. Lewis and the Crisis of a Christian** Gregory S.

Cootsona, 2014-09-26 C S Lewis has long been recognized as a beloved author of children's literature and an apologist for Christian belief to a skeptical modern world In this new volume Gregory S Cootsona shows us how Lewis can also serve as a guide to the ups and downs of the Christian journey Like many of us Lewis suffered from a variety of crises of faith and personal experience Like us he came to faith in a world that no longer respects Christian commitment or offers much room for belief in God Like us he felt the absence of God when those closest to him died Like us he wrestled with doubt wondering if God is real or simply the projection of his own wishes onto the screen of the universe Like us he knew the kinds of temptations he described with such poignancy and humor in The Screwtape Letters By examining these and the other crises of C S Lewis's life Cootsona shows us how Lewis found God in each one and how he shared those discoveries with us in his writing All those wishing to deepen and enrich their own spiritual journey will find much guidance and wisdom in these pages Perspectives on Science and Christian Faith, 2004 The Christian Librarian, 2001 Articles on Christian interpretation of librarianship theory and practice of library science bibliographic essays reviews and human interest articles relating to books and libraries *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences*, 2002 The British National Bibliography Arthur James Wells, 2009 *Civil*

Ecological Awareness Sigurd Bergmann, Heather Eaton, 2011 The past years have seen an ecological development in religions that is staggering These efforts are responses to difficult local and global ecological problems with an increased awareness that religions need to be alert engaged and active partners in the work for a sustainable future Ecological Awareness with 17 authors from theology religious studies biology sociology and philosophy explores how religious practitioners have become increasingly aware of ecological challenges The book considers aspects of ecological awareness personal social political religious and ecological It sheds new light on an essential function of belief systems which function not only as cognitive and moral systems but emerge from and affect our human body and its mode of perceiving our milieu and ourselves within it The book contributes to an increasing awareness of our embeddedness in larger life processes as well as the awareness of life as a gift

Faith seeking understanding Nico Vorster, Frederik van Niekerk, 2023-03-01 How did it all begin How do we even start to engage the differences between creation narratives in the Christian Bible and modern scientific theory The authors of this book explore hermeneutic approaches and developments in biblical studies to set the scene for a religious approach This approach is open to the possibility that a literalist approach to Scripture is in fact the most unjustifiable reading of the Bible This may profoundly

affect how we view God the cosmos and even ourselves To be able to read the Bible from the perspective of an open present and future paves the way for suppressed uncertainties to be liberated This paves the way for humankind to freely question all things without being enslaved by imposed religious dogma This is not to say that religion has served its purpose but it is far from it With the rise of technological advancements come other social and anthropological problems not to mention the challenge we face on a global scale with climate change et cetera Just as we dare to peek over the edge of a future without religion the authors bring us back to the fundamental teachings of faith traditions Christianity in particular They remind us that the solutions to these challenges are to be found in us becoming better humans Becoming better humans brings us back into the arena of faith traditions When technology may lead to social disconnection and narcissism religion calls for love of self and neighbour Where greed inspired advancements threaten the future of our planet religion teaches us to be in relationship with our environment and to be custodians of it

Intersections James M. Gustafson,1996 In his 1994 *A Sense of the Divine The Natural Environment from a Theocentric Perspective* James M Gustafson offered a long awaited application of his theocentric ethics In *Intersections* Gustafson continues to insist that theology and theological ethics must overlap with other diverse fields of study particularly the hard sciences if they are to remain rich vital and relevant in the years ahead With trademark clarity he relentlessly pursues the fundamental questions of theological ethics the nature of being human what distinguishes us from other species how our self interest conflicts with our sympathy and concern for others and the role of religious faith After contrasting two interpretations of human nature one from theologian Reinhold Niebuhr the other from biologist Melvin Konner Gustafson suggests four modes of moral discourse about medicine then examines styles of religious reflection in medical ethics Briefly sharpening his focus on genetic therapy he moves to larger questions of human viability concluding with a stirring call to scholars clergy and laypersons alike to engage in these intellectual intersections intersections that have above all supreme practical importance in our daily lives
