Creation Of Meaning In Clinical Social Work:

The Creation of Meaning in Clinical Social Work Carolyn Saari, 1991-09-20 Reflecting the trend of constructivist thinking across the sciences this volume provides a framework for integrating newer ideas with the traditional practice of clinical social work Its underlying assumptions are that construction of a mutual meaning system between therapist and client is essential for treatment and that identity complexity is essential to healthy adaptation Relating to former notions of process and content in treatment this volume by Carolyn Saari illuminates these concepts In her previous book *Clinical Social Work Treatment How Does It Work* Saari demonstrated the importance of a shared meaning system in treatment In this significant new work she offers a detailed examination of the manner in which such meaning is constructed She also shows how this theory more adequately bridges the gaps between the intrapsychic and the interpersonal as well as between the individual and the social structure As she explains in her introduction the adaptive point of view has provided an inadequate foundation for clinical social work theory A theory of meaning in which psychological health is indicated by a constructed personal meaning system or identity that is highly differentiated articulated and integrated is proposed to take the place of conceptualizations about adaptation This theory of meaning which includes the idea that what the child internalizes is his or her experiences with the world is believed to hold more utility for understanding the psychological effects of phenomena such as racism and social oppression In an intellectual climate involving much heated debate between treatment methodologies based upon scientific empiricism and those based on hermeneutics Saari argues that clinical theory must rely on both a causal developmental science and on a theory of meaning that involves the narrative construction of the possible Her work lays the foundation for sorting out the aspects of clinical theory that involve each of these ways of thinking and for exploring their interaction Providing the basis for a deeper understanding of the complexities of human functioning and clinical practice this volume is an enlightening guide for advanced graduate students and an invaluable resource for practicing clinicians

Padilla, Ruth McRoy, Rocío Calvo, 2020-05-21 With research showing that clients from diverse racial and ethnic groups disproportionately experience barriers in their interactions with social services and that providers recognize the need to be better prepared to work with these groups this book invites us to rethink current approaches to social work practice with multicultural communities We begin with a synthesis of the current evidence on the provision of care to multicultural communities that provides an in depth look at both client and provider experiences The following chapters offer tangible research based approaches to engaging with multicultural clients and reveal often unrecognized problems with current models of social work practice A unique compilation of rigorous qualitative experimental and community based studies demonstrate the effectiveness of culturally grounded interventions and identify the specific factors associated with positive outcomes Areas covered include disability marriage and couple relationship problems domestic violence and mental illness within Latinx African American First Nations and South Asian communities As the authors in this book show the stories of multicultural communities are narratives of unprecedented resourcefulness and reinvention Yet social work underutilizes rich family and community cultural resources By not facilitating their involvement social service systems compromise these vital resources which social services cannot replace In arguing that we need to expand professional boundaries to encompass indigenous practices family and extended kin and therapeutic relationships that make sense to different cultural groups this book will be of interest to those studying the ways in which social work practice can be improved to better suit the needs of a racially and ethnically diverse population This book was originally published as a special issue of the *Journal of Ethnic Cultural Diversity in Social Work*
