The Creation of Modern Athens Eleni Bastéa, 1999-10-13 The Creation of Modern Athens Planning the Myth is the first book to examine the urban development of Athens in the nineteenth century Analyzing the process of architectural and urban design Eleni Bastea reveals the multiple and often conflicting interpretations of the new city By following two parallel processes the building of the new capital and the construction of a new national Greek identity Bastea demonstrates that Athens elaborate urban design and civic architecture reflected both international neoclassical ideals as well as the national aspirations of the modern Greek nation Russia and the Making of Modern Greek Identity, 1821-1844 Lucien J.

Frary, 2015-06-11 The birth of the Greek nation in 1830 was a pivotal event in modern European history and in the history of nation building in general As the first internationally recognized state to appear on the map of Europe since the French Revolution independent Greece provided a model for other national movements to emulate Throughout the process of nation formation in Greece the Russian Empire played a critical part Drawing upon a mass of previously fallow archival material most notably from Russian embassies and consulates this volume explores the role of Russia and the potent interaction of religion and politics in the making of modern Greek identity It deals particularly with the role of Eastern Orthodoxy in the transformation of the collective identity of the Greeks from the Ottoman Orthodox millet into the new Hellenic Christian imagined community Lucien J Frary provides the first comprehensive examination of Russian reactions to the establishment of the autocephalous Greek Church the earliest of its kind in the Orthodox Balkans and elucidates Russia s anger and disappointment during the Greek Constitutional Revolution of 1843 the leaders of which were Russophiles Employing Russian newspapers and thick journals of the era Frary probes responses within Russian reading circles to the reforms and revolutions taking place in the Greek kingdom More broadly the volume explores the making of Russian foreign policy during the reign of Nicholas I 1825 55 and provides a distinctively transnational perspective on the formation of modern identity

Ching,Mark M. Jarzombek,Vikramaditya Prakash,2007 The award winning First Edition of A Global History of Architecture was a publishing event that forever changed the way architectural history is viewed and studied This Second Edition surpasses the first with a lavish new design illustrated throughout with drawings and photographs in full color and even more maps and diagrams detailing global interconnections The signature drawings of Francis D K Ching are more informative than ever updated with scale annotation and function added where needed This revision is sure to remain the most relevant book on the topic      *Constructions of Greek Past* Hero Hokwerda,2003 In May 1999 a second conference of Hellenists of all periods and subject areas from the Dutch speaking countries was organized in Groningen The theme of this second conference was Constructions of Greek Past Identity and Historical Consciousness from Antiquity to the Present The conference theme was described as follows When seeking to establish its own identity a culture country people nation readily resorts to its own history which it uses either as an example or as something to react against In recent years there has been a growing awareness that this process often reveals more about a culture in the present day than the historical era to which it harks back its own identity and thus its own history are constructed in this way The constructional approach is usually applied to the birth of new nation states and the development of their national ideologies particularly in the nineteenth century But it can be applied more broadly too Greek culture is an excellent subject area for studying this phenomenon even further back in history precisely because its history is so long and included several Golden Ages to which later periods could and can hark back Greek culture still presents itself as a product of Ancient Greek and or Byzantine culture However the problem of continuity in Greek culture has frequently manifested itself particularly during periods of radical political ideological or demographic change The Homeric influence on the Mycenaean world is therefore also an aspect of this phenomenon The Homeric world served as an example for later periods as did the Attic period for the Greeks in the Hellenistic Roman age The tensions between the Hellenistic and Roman character of the Greek world had a strong influence on the shaping of the Greek identity during late Antiquity and the Middle Ages Those tensions still exist today ellenism s ellenik tita v romiosyni The theme was designed to bring together Hellenists of all periods and disciplines literature language history archaeology ecclesiastical history sociology etc relating to the Greek world The colloquium sessions were held in Dutch but the papers are published in English two in French      **American Journal of Archaeology** ,2004      **CED News** ,1997      **Η συμβολή της αρχαίας Σπάρτης στην πολιτική σκέψη και πρακτική** Paul Cartledge,Νίκος Μπριγάλιας,Kostas Buraselis,2007      **Pharos** ,2004      *Imagining the Turkish House* Carel Bertram,2008-08 Houses can become poetic expressions of longing for a lost past voices of a lived present and dreams of an ideal future Carel Bertram discovered this truth when she went to Turkey in the 1990s and began asking people about their memories of the Turkish house The fondness and nostalgia with which people recalled the distinctive wooden houses

that were once ubiquitous throughout the Ottoman Empire made her realize that the Turkish house carries rich symbolic meaning In this delightfully readable book Bertram considers representations of the Turkish house in literature art and architecture to understand why the idea of the house has become such a potent signifier of Turkish identity Bertram s exploration of the Turkish house shows how this feature of Ottoman culture took on symbolic meaning in the Turkish imagination as Turkey became more Westernized and secular in the early decades of the twentieth century She shows how artists writers and architects all drew on the memory of the Turkish house as a space where changing notions of spirituality modernity and identity as well as the social roles of women and the family could be approached contested revised or embraced during this period of tumultuous change
