Creationist Writings Of Byron C Nelson:

The Creationist Writings of Byron C. Nelson Byron Christopher Nelson, 1995 First published in 1995 Routledge is an imprint of Taylor Francis an informa company **The Creationist Writings of Byron C. Nelson** Paul Nelson, 2023-10-31 Originally published in 1995 this is the fifth volume in the series *Creationism in 20th Century America* It re publishes *After Its Kind* a critique on theories of biological evolution and a defense of the biblical account of creation which Nelson wrote when he was a Pastor in New Jersey where he also attended classes in genetics and zoology at Rutgers university His 1931 volume *The Deluge Story in Stone A History of the Flood Theory of Geology* also reprinted here was continuously in print until the 1960s As his scientific and theological correspondence expanded in the wake of his publications Nelson became further involved in the evolution debates During the late 1930s his writings concentrated on early man and the glacial phenomena he saw all about him in Wisconsin and he compiled the materials he thought necessary to relate Scripture to the evidence of human antiquity **Creationism in Twentieth-century America: The creationist writings of Byron C. Nelson** , 1995 *The Creationists* Ronald L. Numbers, 1993-01-01 Forty seven percent of the American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years Ronald L Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement s tangled roots in the theologies of late nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers s story of today s widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth s antiquity to the insistence of present day scientific creationists that most fossils date back to Noah s flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science *Darwinian Heresies* Abigail Lustig, Robert J. Richards, Michael Ruse, 2004-08-30 In *Darwinian Heresies* which was originally published in 2004 prominent historians and philosophers of science trace the history of evolutionary thought and challenge many of the assumptions that have built up over the years Covering a wide range of issues starting in the eighteenth century *Darwinian Heresies* brings us through the time of Charles Darwin and the Origin and then through the twentieth century to the present It is suggested that Darwin s true roots lie in Germany not his native England that Russian evolutionism is more significant than many are prepared to allow and that the true influence on twentieth century evolution biology was not Charles Darwin at all but his often despised contemporary Herbert Spencer The collection was intended to interest to excite to infuriate and to stimulate further work *Early Creationist Journals* Ronald L. Numbers, 1995 First published in 1995 Routledge is an imprint of Taylor Francis an informa company *Creation and Evolution in the Early American Scientific Affiliation* Mark A. Kalthoff, 1995 First published in 1995 Routledge is an imprint of Taylor Francis an informa company *Science and Christianity in Pulpit and Pew* Ronald L. Numbers, 2007-09-10 These essays address broad

topics such as the popularization of scientific ideas secularization and the development of the naturalistic worldview

Creation-Evolution Debates Ronald L. Numbers, 2021-10-17 Originally published in 1995 Creation Evolution Debates is the second volume in the series Creationism in Twentieth Century America reissued in 2021 The volume comprises eight debates from the early 1920s and 1930s between prominent evolutionists and creationists of the time The original sources detail debates that took place either orally or in print as well as active debates between creationists over the true meaning of Genesis I The essays in this volume feature prominent discussions between the likes of Edwin Grant Conklin Henry Fairfield Osbourne and William Jennings Bryan John Roach Francis and Charles Francis Potter George McCready Price and Joseph McCabe and William Bell Riley versus Charles Smith amongst many others The collection will be of especial interest to natural historians and theologians as well as academics of philosophy and history

"After Its Kind" Rev. Byron C. Nelson, 2017-07-31 The pages of this book are the product of years of study of a Bible lover who has gone through the fiery furnace of skepticism and has come out firmly convinced of the scientific trustworthiness of the first chapter of the Book of Genesis In this book are contained the conclusions of an examining and weighing of evidences and arguments for and against the theory of evolution which began when as a young man in the University of Wisconsin the author's Christian faith was almost destroyed by the wave of evolutionary philosophy and pseudo science that has swept over the universities and colleges of our land The incentive to write these pages was a desire to give to others the benefit of the author's personal experience Having been fortunate or unfortunate enough to have been caught early in life in the maelstrom of religious uncertainty that catches so many in our day due to the widespread discussion of evolution and having been driven by a desire to know the truth cost what it may to follow every important evolutionary argument to its end and then having finally concluded that nothing is so scientific as the Bible statement after its kind the author believed that a work on the subject of evolution by him might meet the needs of some others who were undergoing an experience like his

Contesting Earth's History in Transatlantic Literary Culture, 1860-1935 Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades Contesting Earth's History examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents

communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time s abyss with bold new eyes The Creation/Evolution Controversy James L.

Hayward,1998-04-30 This collection of 447 annotated references provides an overview of the literature addressing the creation evolution controversy for students teachers lawyers writers historians scientists sociologists clerics and other interested persons Fifty four annotations in the chapter on historical references highlight influential volumes published between 1543 and 1980 classic works that inform the views of later writers These historical works are listed chronologically in order of publication The remaining 393 entries feature books published from 1981 the year of the Scopes II trial in Arkansas to 1996 and include works that address historical sociological philosophical religious cosmological geological biological and anthropological issues surrounding the creation evolution controversy The annotations are written in an informative impartial style Except for references in the chapter containing historical sources and in the chapter featuring works on the history of the creation evolution controversy references are grouped under theistic and non theistic headings An introductory essay describes the history of evolutionary theory and creationism and defines the distinguishing features of each thought system An annotated list of periodicals featuring articles on creationism and evolutionism is also provided With author title and subject indexes **The Cumulative Book Index** ,1996 A world list of books in the English language
