Business Information Systems Pie:

Evaluating Information Systems Zahir Irani, Peter Love, 2008-05-12 The adoption of Information Technology IT and Information Systems IS represents significant financial investments with alternative perspectives to the evaluation domain coming from both the public and private sectors As a result of increasing IT IS budgets and their growing significance within the development of an organizational infrastructure the evaluation and performance measurement of new technology remains a perennial issue for management This book offers a refreshing and updated insight into the social fabric and technical dimensions of IT IS evaluation together with insights into approaches used to measure the impact of information systems on its stakeholders In doing so it describes the portfolio of appraisal techniques that support the justification of IT IS investments Evaluating Information Systems explores the concept of evaluation as an evolutionary and dynamic process that takes into account the ability of enterprise technologies to integrate information systems within and between organisations In particular when set against a backdrop of organisational learning It examines the changing portfolio of benefits costs and risks associated with the adoption and diffusion of technology in today s global marketplace Finally approaches to impact assessment through performance management and benchmarking is discussed *Business Information Systems*
