*An Introduction to Modern Business Statistics* George C. Canavos,Don M. Miller,1999 Using the computer to eliminate rote computation and facilitate learning this book inspires and motivates readers to learn statistics by showing them its great practical importance to their careers In every chapter the authors include an ample number of examples and vignettes that illustrate and emphasize skills that enable students to interpret data

effectively and to convert data into usable information This approach enhances students abilities to make better decisions thus preparing them to exert greater influence in their future careers To reinforce the idea that statistics is the linkage that transforms data into useful information thereby enhancing planning and decision making almost every numbered example includes introductory language that articulates the importance of the illustration in a functional area of business The authors use Microsoft Excel MINITAB and JMP IN statistical software to execute statistical methods presenting computer outputs and interpretation first then illustrating the method using statistical tables In addition to promote the learning of fundamentals the authors also take the users through many methods step by step using examples with very small data sets Chapter appendices provide clear detailed instructions on the use of Excel MINITAB and JMP IN Users are not just purchasing a textbook every new copy of the book is packaged with a student software and data disk This disk contains Data Analysis Plus Add ins for Microsoft Excel as well as all the data sets used in the book formatted for Excel MINITAB JMP IN and ASCII In addition to the many examples and exercises they included in the First Edition the authors add approximately 120 exercises based on published articles in academic journals the popular media or widely available sources of data Many of these exercises contain large data sets and many are revisited in subsequent chapters

**Bulletin - Institute of Mathematical Statistics** Institute of Mathematical Statistics,1984      Artificial Intelligent Methods for Handling Spatial Data Jörg Verstraete,2018-08-31 This book provides readers with an insight into the development of a novel method for regridding gridded spatial data an operation required to perform the map overlay operation and apply map algebra when processing spatial data It introduces the necessary concepts from spatial data processing and fuzzy rulebase systems and describes the issues experienced when using current regridding algorithms The main focus of the book is on describing the different modifications needed to make the problem compatible with fuzzy rulebases It offers a number of examples of out of the box thinking to handle aspects such as rulebase construction defuzzification spatial data comparison etc At first the emphasis is put on the newly developed method and additional datasets containing information on the underlying spatial distribution of the data are identified After this an artificial intelligent system in the form of a fuzzy inference system is constructed using this knowledge and then applied on the input data to perform the regridding The book offers an example of how an apparently simple problem can pose many different challenges even when trying to solve it with existing soft computing technologies The workflow and solutions to solve these challenges are universal and may therefore be broadly applied into other contexts
