Buying Information Systems Selecting Implementing And Assessing Off The Shelf Systems:

Buying Information Systems Mr David James, 2012-09-28 Most organisations purchase off the shelf computer based systems to help them perform their day to day business activities Sadly many of the purchases fail to live up to expectations This book provides a blueprint of what to cover in the early stages of the procurement process so as to prevent the recurring problem of information systems projects that run over budget over time and yet under perform The questions the book answers are simple but fundamental where to find advice who should be involved how to manage the purchase how to decide what you need which package or supplier to choose how to manage the implementation and how to know if the system is successful Real examples of information system purchases are used to help provide practical guidance on the methods the pitfalls and the keys to success In addition the book contains several adaptable tables and checklists to provide a flexible and effective step by step framework for the entire process *Enforcing Intellectual Property Rights* Miss Jane

Lambert, 2012-09-28 What do you do if you need to seek a court order against a former employee who has set up in competition with you having first helped themselves to your customer database Or if you are deluged with complainants who have bought products they thought were yours but turn out to have been made from inferior materials and without your knowledge or consent Or if you receive a solicitor s letter complaining that a product you are about to launch infringes their client s trade mark or registered design Jane Lambert s concise and practical guide gives you the knowledge that you need to make crucial decisions to protect your intellectual assets before it is too late It should be kept close at hand for use in emergencies just like a first aid manual Its purpose is to alert you to problems so that you can take the right steps to manage them in consultation with your professional advisors before they develop into crises And if the worst does happen and you need to go to law the guide provides you with the information you need to understand the process the risks and how to prepare effectively If you are planning an enforcement strategy looking for the optimum patent or registered trade mark or design protection and to secure the appropriate insurance to make sure you have a fund available to enforce these then this book is for you If you re already in hot water someone with an intellectual property problem who needs to make fast decisions in very little time then this book is for you too It could help you avoid the most expensive mistake of your life
