Crash That Stopped Britain:

The Crash that Stopped Britain Ian Jack, 2001 The Hatfield train crash on October 17th last year killed four people and caused several months of social chaos This is the frightening story of the unnecessary ruin of the British rail system

Mobilities John Urry, 2007 Issues of movement of people things information and ideas are central to people's lives and to most organisations From oil wars to SMS texting from airport expansion controversies to the decline of walking from slave trading to global terrorism from global warming to teleworking issues of mobility are centre stage upon many academic and policy agendas These topics and issues are increasingly analysed as part of a concern with mobility which this wide ranging book both describes and seeks to develop John Urry has been at the centre of these debates and he draws upon an extensive array of new research and material to develop what he calls the new mobilities paradigm for the social sciences He shows how this paradigm makes comprehensible social phenomena which were previously opaque He examines how mobilities each presuppose a system that permits predictable and relatively risk free repetition The book outlines various such systems and then analyses their intersecting implications for social inequality for social networks and meetings for the nature of places and for alternative mobility futures Mobilities is thus both an analysis of different mobilities historically and in the present and an argument that the social world will be analysed quite differently once people's lives organisations states and global institutions are seen to be dealing with extensive and hugely contested mobility processes This book rewrites social science through a mobilities paradigm

Docufictions Gary D. Rhodes, John Parris Springer, 2014-10-01 Through most of the 20th century the distinction between the fictional narrative film and the documentary was vigorously maintained The documentary tradition developed side by side with but in the shadow of the more commercially successful feature film In the latter part of the century however the two forms merged on occasion and mockumentaries fictional works in a documentary format and docudramas reality based works in a fictional format became part of the film and television landscape The 18 essays here examine the relationships between narrative fiction films and documentary filmmaking focusing on how each influenced the other and how the two were merged in such diverse films and shows as Citizen Kane M A S H This Is Spinal Tap and Destination Moon Topics include the docudrama in early cinema the industrial film as faux documentary the fear evoked in 1950s science fiction films the selling of reality in mockumentaries and reality television and documentary forms The essays provide a foundation for significant rethinking of film history and criticism offering the first significant discussion of two emerging and increasingly important genres Instructors considering this book for use in a course may request an examination copy here

Education, Professionalism and the Quest for Accountability Jane Green, 2011-05-20 Today workers based in institutions designed to serve the public teachers nurses social workers community officers librarians civil servants etc are expected to reorganize their thoughts and practice in accordance with a performance management model of accountability which encourages a rigid bureaucracy one which translates regulation and monitoring procedures into inflexible and obligatory compliance This book shows how and why this performance model may be expected paradoxically to make practices less accountable and in the case of education less educative

Comprehensive Structural Integrity Ian Milne, R. O. Ritchie, B.L. Karihaloo, 2003-07-25 The aim of this major reference work is to provide a first point of entry to the literature for the researchers in any field relating to structural integrity in the form of a definitive research reference tool which links the various sub disciplines that comprise the whole of structural integrity Special emphasis will be given to the interaction between mechanics and materials and structural integrity applications Because of the interdisciplinary and applied nature of the work it will be of interest to mechanical engineers and materials scientists from both academic and industrial backgrounds including bioengineering interface engineering and nanotechnology The scope of this work encompasses but is not restricted to fracture mechanics fatigue creep materials dynamics environmental degradation numerical methods failure mechanisms and damage mechanics interfacial fracture and nano technology structural analysis surface behaviour and heart valves The structures under consideration include pressure vessels and piping off shore structures gas installations and pipelines chemical plants aircraft railways bridges plates and shells electronic circuits interfaces nanotechnology artificial organs biomaterial prostheses cast structures mining and more Case studies will form an integral part of the work *Britain's Railways 1997-2005* Terence Richard Gourvish, 2008 Britain's leading railway historian provides a critical examination of the Blair governments involvement in the rail industry from 1997 as they attempted to deal with the UK's fragmented privatized railways The book focuses particularly on the work of the

Strategic Rail Authority SRA and considers the role of individuals John Prescott Stephen Byers Alistair Darling Sir Alastair Morton and Richard Bowker and events the Hatfield accident 2000 the demise of Railtrack 2001 2 and the funding crisis of 2003 4 in the shaping of emerging policy The book was commissioned by the SRA and written with access to government files Dr Gourvish argues that the establishment of the SRA as a Non Departmental Public Board proved largely unsuccessful It produced tensions with the industry s existing institutions Railtrack Network Rail the operating companies and the economic regulator There were some gains from the experiment notably the rescue of the West Coast Main Line project However it remains to be seen whether by winding up the SRA and taking responsibility for strategy and funding back into its own hands the Department for Transport has resolved the problem of managing a fragmented industry This important book is essential reading for those concerned with and interested in railway policy both in the UK and elsewhere in the world On the Wrong Line Christian Wolmar, 2005 Christian Wolmar s acclaimed Broken Rails charted the disastrous privatisation of the British railway system in the mid 1990s Now in an updated and expanded version of the book Wolmar highlights the failure of New Labour to get to grips with the legacy it inherited The railways now absorb more taxpayers money than ever before while performance has reached an all time low Wolmar suggests that the railways may soon be under threat from a massive round of cuts and closures or that debts already at USD10bn will mount up with catastrophic effect But he argues that there is a third option a return to a rational railway in which the disparate pieces are reassembled into a functioning network
