Creating Citizens Political Education And Liberal Democracy:

Creating Citizens Eamonn Callan, 1997 Any liberal democratic state must honour religious and cultural pluralism in its educational policies To fail to honour them would betray ideals of freedom and toleration fundamental to liberal democracy Yet if such ideals are to flourish from one generation to the next allegiance to the distinctive values of liberal democracy is a necessary educational end whose pursuit will constrain pluralism The problem of political education is therefore to ensure the continuity across generations of the constitutive ideals of liberal democracy while remaining hospitable to a diversity of conduct and belief that sometimes threatens those very ideals *Creating Citizens* addresses this crucial problem In lucid and elegant prose Professor Callan one of the world's foremost philosophers of education identifies both the principal ends of civic education and the rights that limit their political pursuit This timely new study sheds light on some of the most divisive educational controversies such as state sponsorship and regulation of denominational schooling as well as the role of non denominational schools in the moral and political development of children Oxford Political Theory presents the best new work in contemporary political theory It is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory The series will contain works of outstanding quality with no restriction as to approach or subject matter The series editors are David Miller and Alan Ryan *Creating Citizens* Eamonn Callan, 1997 This book presents a compelling new theory of political education for liberal democracies Amidst current concern over the need to encourage a morally sensitive and committed citizenry Professor Callan's study provides a much needed balanced discussion of the proper ends of education as well as the moral rights of parents and children [Citizenship and Education in Liberal-Democratic Societies](#) Kevin McDonough, Walter Feinberg, 2003-08-28 The essays in this volume address the educational issues which arise when national sub national and supra national identities compete How can we determine the limits of parental educational rights when the concern of liberalism to protect and promote children's autonomy conflicts with the desire to maintain communal integrity Given the advances made by the forces of globalization can the liberal democratic state morally justify its traditional purpose of forging a cohesive national identity Or has increasing globalization rendered this educational aim obsolete and morally corrupt Should liberal education instead seek to foster a sense of global citizenship even if doing so would suppress patriotic identification In addressing these and many other questions the volume examines the theoretical and practical issues at stake between nationalists multiculturalists and cosmopolitans in the field of education The fifteen essays plus an introductory essay by the editors provide a genuine productive dialogue between political and legal philosophers and educational theorists [Surviving Diversity](#) Jeff Spinner-Halev, 2000-05-22 6 The Public Squares [Rethinking Ethical-Political Education](#) Torill Strand, 2020-07-29 This book offers a variety of outlooks and perspectives on the constitutive values and formative norms of a society reflected by discourses on ethical political education It also discusses conceptual and critical philosophical works combined with empirical studies The book is divided into three

parts the first part describes contemporary youth's tangible experience of and reflections on ethical political issues while the second part explores the potential powers and pitfalls of educational philosophies old and new The third part highlights cutting edge issues within the humanities and social sciences and examines the prospects of a fruitful rethinking of ethical political education in response to today's pressing issues By addressing current dilemmas with diligence and insight the authors offer solid arguments for new theoretical and practical directions to promote philosophical clarification and advance research Intended for students teachers and researchers the book provides fresh perspectives on the many facets of ethical political education and as such is a valuable contribution to educational research and debate **University of Chicago Law**

History, Civic Education, and Liberal Democracy Jeffrey Douglas Jones, 2000 **Contemporary Political Philosophy** Will Kymlicka, 2002 This new edition of Will Kymlicka's best selling critical introduction to contemporary political theory has been fully revised to include many of the most significant developments in Anglo American political philosophy in the last 11 years particularly the new debates on political liberalism deliberative democracy civic republicanism nationalism and cultural pluralism The book now includes two new chapters on citizenship theory and multiculturalism in addition to updated chapters on utilitarianism liberal egalitarianism libertarianism Marxism communitarianism and feminism Extended guides to further reading have been added at the end of each chapter listing the most important books and articles on each school of thought as well as relevant journals and web sites **BOOK JACKET School Choice Policies and Outcomes** Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children's schools Opponents of school choice fear that rolling back the government's role will lead to profit driven financial scandals sectarianism and increased class and racial isolation School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity The contributors to

this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement Their message is that neither markets nor government alone will guarantee freedom equality achievement or community If choice is to improve education and advance equality then educational policy cannot be placed on automatic and left to the free market Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished
