Creating Contexts For Second Language Acquisition:

Creating Contexts for Second Language Acquisition Arnulfo G. Ramirez, 1995 **The Study of Second Language Acquisition in the Asian Context**, 2006 This book will be of special interest to English teachers and those in professional development in the region and or who have classrooms with Asian learners Paradigms appear to be shifting in Asian L2 learning in a region providing huge growth in English education This will have an important bearing on the profession including researchers worldwide **A Philosophy of Second Language Acquisition** Marysia Johnson, 2008-10-01

How does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner s mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky s sociocultural theory and Bakhtin s literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson s model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance Original and controversial A Philosophy of Second Language Acquisition offers an introduction to Vygotsky s sociocultural theory and Bakhtin s literary theory both of which support an alternative framework for second language acquisition an examination of the existing cognitive bias in SLA theory and research a radically new model of second language acquisition

Second Language Acquisition Susan M. Gass, Larry Selinker, 2008-01-31 A clear and accessible introductory textbook on second language acquisition research focusing on methodological issues L1 influence theories of second language research interlanguage issues L2 input nonlinguistic factors affecting L2 acquisition instructed SLA and the role of the lexicon It is intended for UG or G students who have little or no background in SLA research but do have a basic grounding in general linguistics Each chapter has exercises and a list of references *Second Language Acquisition and the Younger Learner* Jenefer Philp, Rhonda Oliver, Alison Mackey, 2008-10-01 This new volume of work highlights the distinctiveness of child SLA through a collection of different types of empirical research specific to younger learners Characteristics of children s cognitive emotional and social development distinguish their experiences from those of adult L2 learners creating intriguing issues for SLA research and also raising important practical questions regarding

effective pedagogical techniques for learners of different ages While child SLA is often typically thought of as simple and often enjoyable and universally effortless in other words as child s play the complex portraits of young second language learners which emerge in the 16 papers collected in this book invite the reader to reconsider the reality for many younger learners Chapters by internationally renowned authors together with reports by emerging researchers describe second and foreign language learning by children ranging from pre schoolers to young adolescents in home and school contexts with caregivers peers and teachers as interlocutors □□□□□□□□□□ □□□□□,2003-03 *Principles of Language Learning and Teaching* H. program on assessment can be carried out After a discussion of issues of public reporting an area which will receive increasing attention in the next few years the volume closes with a discussion of what new issues and answers the future may bring The book reflects the current belief in direct writing assessment in second language writing assessment While it is often expected that those working with ESL students will focus on language error throughout the book themes of needs attitudes ideas and content dominate For second language writers the use of written language to learn to create knowledge and to share ideas and beliefs are vitally important Additionally issues of cross cultural academic literacy practical information on criteria and scoring models for use with ESL writers and research on the efficacy and effects of various assessment models are provided The book blends theory and practice in a way which offers all those who are concerned with the writing skills of nonnative users of English an invaluable resource
