Creating The National Pastime:

Creating the National Pastime G. Edward White, 2014-04-10 At a time when many baseball fans wish for the game to return to a purer past G Edward White shows how seemingly irrational business decisions inspired in part by the self interest of the owners but also by their nostalgia for the game transformed baseball into the national pastime Not simply a professional sport baseball has been treated as a focus of childhood rituals and an emblem of American individuality and fair play throughout much of the twentieth century It started out however as a marginal urban sport associated with drinking and gambling White describes its progression to an almost mythic status as an idyllic game popular among people of all ages and classes He then recounts the owner s efforts often supported by the legal system to preserve this image Baseball grew up in the midst of urban industrialization during the Progressive Era and the emerging steel and concrete baseball parks encapsulated feelings of neighborliness and associations with the rural leisure of bygone times According to White these nostalgic themes together with personal financial concerns guided owners toward practices that in retrospect appear unfair to players and detrimental to the progress of the game Reserve clauses blacklisting and limiting franchise territories for example were meant to keep a consistent roster of players on a team build fan loyalty and maintain the game s local flavor These practices also violated anti trust laws and significantly restricted the economic power of the players Owners vigorously fought against innovations ranging from the night games and radio broadcasts to the inclusion of African American players Nonetheless the image of baseball as a spirited civic endeavor persisted even in the face of outright corruption as witnessed in the courts leniency toward the participants in the Black Sox scandal of 1919 White s story of baseball is intertwined with changes in technology and business in America and with changing attitudes toward race and ethnicity The time is fast approaching he concludes when we must consider whether baseball is still regarded as the national pastime and whether protecting its image is worth the effort

States and its allies could have used a population centric approach to build viable states in Iraq and Afghanistan focusing on initiatives that would have given the population buy in and agency Moving forward Gregg proposes a six step program for state and nation building in the twenty first century stressing that these efforts are as much about how state building is done as they are about specific goals or programs *Cooperstown Symposium on Baseball and the American Culture* ,2000
