Joseph, 2014 On October 1 2009 the People's Republic of China PRC celebrated the 60th anniversary of its founding And what an eventful and tumultuous six decades it had been During that time under the leadership of the Chinese Communist Party CCP China was transformed from one of the world's poorest countries into the world's fastest growing major economy and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence Over those same years the PRC also experienced the most deadly famine in human history caused largely by the actions and inactions of its political leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy Today China is for the most part peaceful prospering and proud This is the China that was on display for the world to see during the Beijing Olympics in 2008 The CCP maintains a firm grip on power through a combination of popular support largely based on its recent record of promoting rapid economic growth and harsh repression of political opposition Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities and a rising tide of social protest Politics in China is an authoritative introduction to how the world's most populous nation and rapidly rising global power is governed today Written by leading China scholars the book's chapters offers accessible overviews of major periods in China's modern political history from the mid nineteenth century to the present key topics in contemporary Chinese politics and developments in four important areas located on China's geographic periphery Tibet Xinjiang Hong Kong and Taiwan **Chinese Politics** Peter Gries, Daniel Lynch, Stanley Rosen, 2010-01-28 Written by a team of leading China scholars this text interrogates the dynamics of state power and legitimation in 21st Century China Despite the continuing economic successes and rising international prestige of China there has been increasing social protests over corruption land seizures environmental concerns and homeowner movements Such political contestation presents an opportunity to explore the changes occurring in China today what are the goals of political contestation how are Chinese Communist Party leaders legitimizing their rule who are the specific actors involved in contesting state legitimacy today and what are the implications of changing state society relations

**Ethnic Realignments** Matthew Hoddie, 2006-01-01 Ethnic Realignments offers a fresh look at the phenomenon of rapidly changing ethnic identity claims. By focusing on the countries of Australia, China, Malaysia and India, Matthew Hoddie provides a comparative study arguing that government policies designed to favor one ethnic group over another can influence individuals among the disfavored group to change their identities and recast themselves as members of the favored group. Hoddie employs a statistical methodology to lay out the conditions and factors that lead to these ethnic identity changes, thereby contributing to the ongoing debate concerning the malleability of ethnic identity. Ethnic Realignments is a significant work for scholars interested in the politics of ethnicity and the effectiveness of affirmative action policies.

**China's Local Administration** Jae Ho Chung, Tao-chiu Lam, 2009-10-16 The remarkable changes in China over the past three decades are mostly considered at the national level, whereas local government, which has played and continues to play a key role in these developments, is often overlooked. The themes of China's local administrative hierarchy and its historical evolution have until now received scant attention; this book fills that gap and presents a comprehensive survey of China's local administration from the province down to the township. It examines the political and functional definitions and historical origins of the nine local administrative levels or categories in contemporary China: the province, the centrally administered municipality, the ethnic minority autonomous region, the special administrative region, the deputy provincial city, the prefecture, the county, township, and urban district. It investigates how each of the different levels of China's local administration has developed historically, both before and after 1949, and it explores the functions, political and economic, that the different levels and units carry out and how their relationships with superior and subordinate units have evolved over time. It also discusses how far the post-Mao reforms have affected local administration and how the local administrative hierarchy is likely to develop going forward.

**Encyclopedia of Modern Ethnic Conflicts** Joseph Russell Rudolph, 2003 Each of 38 ethnic conflicts is presented with a timeline and extensive essay covering the conflict's details, historical background, management, and significance. This book is the perfect starting point for students and general readers seeking information about the complex and often violent forces that have changed and continue to change the world's political landscape.

**Contemporary Minority Migration, Education, and Ethnicity in China** Robyn R. Iredale, Naran Bilik, Wang Su, Fei Guo, Caroline Hoy, 2001 Rural urban migration is an important aspect in the development of countries Until the late 1980s China was one of the few countries that controlled population movement both directly and indirectly through policies of economic and social control The gradual relaxation of these policies has resulted in greater freedom of movement for the population the effects of which are discussed in this significant volume The book concentrates on the migration of minorities from a social economic and ethnic perspective and attempts to quantify the overall level of movement In particular the authors examine the relationships between education ethnicity and migration and identify the policies and conditions conducive to achieving positive outcomes for minority migrant households The book aims to increase our understanding of the effects of movement on the social economic and ethnic status of migrant families Taking existing census data as a starting point the book makes a new contribution by drawing on a unique survey in four different regions the data from which is used as the basis for detailed case study analysis The study of internal migration is vital the authors argue in order to understand the change process from a centrally planned economic system to a market orientated society in China The internal mobility of minorities can be regarded equally as both a product of and a contributing factor to this social transformation This notable and very readable book will be of significant interest to policymakers international and development economists and researchers and students of Asian economics and demographics
