Ethical Transformations for a Sustainable Future Olivier Urbain, Deva Temple, 2011-12-31 It has become increasingly apparent that humanity s complex social political and economic systems are incompatible with the finite capacity of the Earth to replenish resources and absorb wastes If the planet is to continue to be habitable for the myriad web of other creatures that make life possible humans must transform their systems so that they are aligned with natural systems One thing is sure it will not be Nature s laws the delicate interdependence that characterizes Earth s ecosystems that change The change must begin within each person and from there permeate throughout our social political and economic structures The contributors to this volume believe that such transformations are urgently needed and possible and they offer specific examples They suggest solutions that call for new perspectives in our ethics beliefs traditions economy business gender relations education and technology They show that human beings have the power to implement changes in all natural and social environments The chapters in this book have been organized around three keywords Reconnecting Reframing and Rethinking The contributors argue that we need to reconnect with the Earth and nature as well as with each other and parts of ourselves that we have ignored for too long We need to reframe the way in which people prioritize choices in the economy the way we do business and pursue development and we need to rethink the mission of education and the roles of technology

American Indians in the Marketplace Brian C. Hosmer, 1999 Although it is usually assumed that Native Americans have lost their cultural identity through modernization some peoples have proved otherwise Brian Hosmer explores what happened when cultural identity and economic opportunity converged among two Native American communities that used community based industries to both generate income and sustain their cultures Comparing a lumber business run by the Menominees of Wisconsin and a salmon cannery established by British Columbian and Alaskan Tsimshian communities known as Metlakatla Hosmer reveals how each tribe responded to market and political forces over fifty years Hosmer s innovative ethnohistory recounts how these Indians used the marketplace to maintain their distinctiveness to a far greater extent than those who became wage earners in the white man s world Hosmer shows that by selectively incorporating elements of American capitalism into their cultural lives the Menominees and Metlakatlans came to view modernization less as a threat to their tribal life than as a means for maintaining their independence These tribes embraced the same market accused of hastening the demise of native societies and became comparatively successful in American terms even as they both honored fundamental values and forged new cultural identities Over time these peoples came to understand how the market worked recognized that the broader economy operated according to market principles and learned how to adjust to it Hosmer reveals how their strategies of purposeful modernization brought relative economic independence and sometimes the respect and cooperation of local and federal governments how it helped chart a middle course between unchecked individuality and a communal ethos that might stifle economic development and how economic development and cultural

values ultimately affected one another American Indians in the Marketplace is a story of adaptation that acknowledges the hardship and suffering common to most Indian white contact while emphasizing the benefits of selective modernization accompanied by a constant re invention of tradition It questions the victim thesis of Native American history and shows that native peoples can meet the challenges of surviving in the larger world **Annual Report of President for the Year ...**
