Excerpt from *The History of Creation Vol 1 of 2 Or the Development of the Earth and Its Inhabitants by the Action of Natural Causes: A Popular Exposition of the Doctrine of Evolution in General and of That of Darwin, Goethe and Lamarck in Particular*. I am desirous of prefacing the English edition of the *History of Creation* with a few remarks which may serve to explain the origin and object of this book. In the year 1866 I published under the title *Generelle Morphologie* a somewhat comprehensive work which constituted the first attempt to apply the general doctrine of development to the whole range of organic morphology, Anatomy and Biogenesis, and thus to make use of the vast march onwards which the genius of Charles Darwin has effected in all biological science by his reform of the Descent Theory and its establishment through the doctrine of selection. At the same time in the *Generelle Morphologie* the first attempt was made to introduce the Descent Theory into the systematic classification of animals and plants and to found a natural system on the basis of genealogy that is to construct hypothetical pedigrees for the various species of organisms. The *Generelle Morphologie* found but few readers for which the voluminous and unpopular style of treatment and its too extensive Greek terminology may be chiefly to blame. Fredericks, 2025-08-26 Biblical theology is adequate only if wholly contextualized within the eternal natures of God creation and history A more thorough awareness of God s eternal design within creation and its history and a fuller perspective on the Messiah s commission avoids significant discontinuities such as universal and redemptive histories the gospels of Jesus and his apostles cross and kingdom of God centers heaven and a new earth and the role of sanctification in the Old and New Testaments This study suggests that God s eternal design for creation and its history subsumes a limited biblical theology that focuses on the solution to the sin problem at the expense of what has always been the eternal practical and productive objective of that solution and its current implications The church can focus on an urgent need for the rescue at the expense of the equally urgent and eternal purpose for that rescue A more comprehensive practical and productive theology of endless creation and its history contextualizes salvation and its eschatological focus by enveloping them as temporary components within God s eternal design      **The History of Creation**

**Karl Barth on the Filioque** David Guretzki,2016-04-22 Despite the burgeoning literature on Karl Barth his doctrine of the Holy Spirit continues to be under appreciated by his friends and critics alike Yet while Barth s commitment to the doctrine of the procession of the Holy Spirit from the Father and the Son Filioque is well known many scholars dismiss his stand as ecumenically untenable and few have bothered to subject his stance on the Filioque to close theological analysis For those interested in this long standing ecumenical point of contention between Eastern and Western trinitarian theology this book will show how Barth s doctrine of the Filioque may still have something to contribute to the debate The work traces the origin of Barth s commitment to the Filioque in his early career particularly in Romans and the G ttingen Dogmatics and then analyzes how the doctrine functions throughout the Church Dogmatics Guretzki concludes that Barth s doctrine of the Filioque while clearly standing within the Western trinitarian tradition is atypical in that he refuses to speak of a double procession in favour of a common procession of the Spirit a position that has more affinity with the Eastern position than many of Barth s critics may have thought **The History of Creation** Ernst Heinrich Philipp August Haeckel,1873
