Evolution Dissected separates biological evolution into distinct categories and examines the characteristics of each category
The vast majority of scientific data concerning biological evolution refers to the alteration of existent and functional DNA and
pertains to only one of the categories of evolution Each of the remaining categories of biological evolution encompasses a
unique set of mechanisms for the origin of functionally new information within the DNA molecule The complexity of the
origin of this new information is many many orders of magnitude greater than the complexity of the alteration of existent
information Two categories of biological evolution lack unique supporting scientific data and are found to be highly irrational
