Dorien J. DeTombe, 1999 **The Problem of Creation** John Edward Mercer (bp. of Tasmania.), 1917 The Creation/Evolution Controversy Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology The Relation Between Major World Problems and Systems Learning: Advances in holistic problem solving and human actions systems research Society for General Systems Research, 1983 **Creation/evolution**, 1987 *Genetics Problem Solving and Worldview* Esther Dale, 2007 **The Kansas City Review of Science and Industry**, 1880 **Kansas City Review of Science and Industry**, 1880 The Relation Between Major World Problems and Systems Learning: The ecology of human knowledge and global problems in systems perspective Society for General Systems Research, 1983
