Creation And Complexity Interdisciplinary Issues In Science And Religion:

Creation and Complexity Christine Ledger, Stephen Pickard, 2004 Creation and Complexity are two themes that draw the sciences and theology together The remarkable advances of science in the modern period have opened up new knowledge and revealed ever deepening layers of complexity in the world from the cosmic macro level to the micro world of quantum There seems no end to the rich tapestry of the cosmic order and process A science of complexity has been spawned The discoveries of the sciences have been matched in the twentieth century by a renewal in the doctrine of creation Behind this lies a renaissance in trinitarian thinking which offers fresh insight into the dynamic of God in creation past present and future The complexity of the triune God in creation find echoes in the rich complexity of the world uncovered by the contemporary sciences This book explores the nature of complexity in God's creation

Socio-Cybernetic Study of God and the World-System Choudhury, Masudul Alam, 2013-10-31 In any field whether scientific business or social ethics plays a critical role in determining what is acceptable in a particular community and what is considered taboo The source of these preconditions is often a complex interweaving of tradition and rational thought Socio Cybernetic Study of God and the World System investigates morality in a socio scientific worldview examining the epistemology of existence in conjunction with Islamic monotheistic law to generate a world system that governs action and reaction in the context of a variety of cognitive and social environments Readers with backgrounds in finance and economics can utilize this book to construct a more thorough theoretical understanding of their societal and professional associations

The Relational Power of God Eleanor O'Donnell, 2023-01-23 When we find the courage to allow our rebel voice to speak many of us question traditional Christian beliefs about God's power and how it is exercised in the world and in the church We ask What if God is not in omnipotent control of everything What if God's exercise of power is relational and noncoercive instead What if it is the quality rather than the quantity of God's power that really matters This book focuses on the theology of power that emerges when we ask such questions It draws on the social Trinitarian theology of Jürgen Moltmann and the process thought of Charles Hartshorne to image God as a Social Trinity in process This vision of God understands the Holy Trinity to be fully relational and thoroughly with us and all creation To think of God and God's power this way ensures freedom for creature and creation and enables a viable response to the problem of evil and suffering It also leads to the conclusion that human relationships in the world and in the church are best modeled on the power sharing solidarity of the Triune God
