Federal District Court Judge John E Jones III ruled that Intelligent Design was not science but an unconstitutional intrusion of religion into the school curriculum His decision upheld contentions by parents in the Dover PA school district that school board members substituted personal religious beliefs for science The ruling came despite calls by President George W Bush for Intelligent Design to be taught as a theory alongside the theory of evolution This hotly contested issue continues to grip the nation and spark intense debate But what is Intelligent Design Can Intelligent Design stand up to the rigors of scientific method Or is it a nonscientific faith inspired interpretation of experience This collection of essays addresses such questions and includes analyses from scientists journalists philosophers and religious leaders and thinkers This volume provides a variety of perspectives in the hope that readers will be better prepared to reach their own conclusions about the issues involved Divided into five sections the first section provides analyses of Judge Jones s decision Section two includes a report on and a response to President Bush s call for Intelligent Design to be taught in schools The third section outlines the origins of the debate including excerpts from the classic works of Charles Darwin and theologian William Paley Section four analyzes the scientific validity of Intelligent Design and includes statements from key scientific associations The highly important concluding section asks whether religion and evolution are compatible This essential volume features selections from Elisabeth Bumiller Matt Cartmill Charles Darwin Daniel C Dennett Barbara Forrest Owen Gingerich Stephen Jay Gould John Paul II Philip Kitcher Ernan McMullen Kenneth R Miller Nancey Murphy William Paley Robert T Pennock Holmes Rolston III Michael Ruse Alfred Tauber Michael W Tkacz James Q Wilson and Carl Zimmer

The Politics of Evolution David F. Prindle, 2015-04-10 The controversy over teaching evolution or creationism in American public schools offers a policy paradox Two sets of values science and democracy are in conflict when it comes to the question of what to teach in public school biology classes Prindle illuminates this tension between American public opinion which clearly prefers that creationism be taught in public school biology classes versus the ideal that science and only science be taught in those classes An elite consisting of scientists professional educators judges and business leaders by and large are determined to ignore public preferences and teach only science in science classes despite the majority opinion to the contrary So how have the political process and the Constitutional law establishment managed to thwart the people s will in this self proclaimed democracy Drawing on a vast body of work across the natural sciences social sciences and humanities Prindle explores the rhetoric of the evolution issue explores its history examines the nature of the public opinion that causes it evaluates the Constitutional jurisprudence that upholds it and explains the political dynamic that keeps it going This incisive analysis is a must read in a wide range of disciplines and for anyone who wants to understand the politics of biology

Silenced! Bruce E. Johansen, 2007-05-30 This book is about people whose beliefs and affiliations have opposed powerful interests in the present day United States This eclectic group of people and controversial issues from climate change scientists who have been censored by the Bush administration to Muslims accused of terrorism have one thing in common All of them straddle the limits of what Noam Chomsky has called permissible debate as defined by dominant political and economic institutions and individuals The central thesis is that restriction of free inquiry is harmful to our culture because it inhibits the search for knowledge Johansen presents case studies in the borderlands of free speech in a Jeffersonian cast an intellectual framework assuming that open debate even of unpopular ideas is essential to accurate perception of reality This book is about people whose ideological circumstances have found them opposing established beliefs in our times scholars advocating the Palestinian cause in a very hostile intellectual environment for example as well as climate scientists defending themselves against the de funding of their laboratories by defenders of fossil fuel interests opponents of creation science under assault for teaching what once was regarded as household variety biology a k a Darwinism Marxists in a political system dominated by neoconservatives The central thesis that unites this diverse array of controversies is that shutting down free inquiry most notably for points of view deemed unpopular dumbs us all down by restraining the search for knowledge which demands open inquiry We have been told when going to war as in Iraq that freedom isn't free the unstated assumption

being that our armed forces are fighting and dying to safeguard our civil rights at home and abroad During recent years however freedom to inquire and debate without retribution has been under assault in the United States This assault has been carried out under a distinctly Orwellian cast under Newspeak titles such as the Patriot Act parts of which might as well be described more honestly as the Restriction of Freedom of Inquiry Act The information gathered here will interest and probably anger anyone who is concerned with protecting robust free inquiry in a nation that takes seriously its freedom to speak out and to define truth through open debate **The Skeptical Inquirer** ,2008 *Scientific American* ,2008
