students are leading a changing culture by utilizing all available resources and opportunities in the space of South Korea's evolving ecological system of education. In addition, this book provides one explanation as to how students from East Asian countries achieve such excellent academic performance. A crucial exploration of the culture and growth of education systems in Asian countries, this book will appeal to scholars and researchers with interests in Korean education and Korean students' academic achievement as an emerging inquiry for both Korean studies and East Asian Cultural Studies. In addition, this book will also be informative for scholars of comparative education, sociology of education, educational policy, and postcolonial educational research in the world.
