## **Ai Tools For Students For College Students:**

Survey of College Students 2025, Use of College Instruction about Generative AI Primary Research Group, 2025-02-12

The study looks at how students are engaging with generative AI through institutional resources. The study details use of courses, websites, online tutorials, and other means to learn about how to use generative artificial intelligence. The survey highlights the varying levels of usage and the reliance on formal and informal learning methods among college students. Results are based on a 2025 representative survey of 1022 students at 4-year colleges and research universities in the USA. Just a few of this 155-page report's many findings are that 30-14% of students have used academic resources provided by their institution to learn about generative AI. Students at higher cost institutions (20,000+) are more likely (36-03%) to use academic resources compared to those at lower cost institutions (27-34%). Private school students (35-90%) are significantly more likely to use resources compared to public school students (28-43%). International students were more avid users than domestic students of college instructional resources about generative AI. Student complaints about being unable to find information about how to use AI were quite common. Students face challenges such as lack of awareness, institutional discouragement, and unclear policies on AI use. They express a need for more structured education, clear guidelines, and greater access to AI tools. The survey suggests that while institutional resources for learning about generative AI exist, most students rely on informal methods such as peers, AI tools, and online content. There is a clear need to expand structured AI education to better support student learning.

Survey of College Students 2025, Use of Generative Artificial Intelligence Primary Research Group, 2025-02-06

This study presents detailed data on use of ChatGPT, Gemini, Grok, Claude, MidJourney, and CoPilot among other applications by students at 4-year colleges in the United States. The highly detailed report shows exactly how many minutes per month students spend on each application. The study also looks at the extent to which students use AI to replace or complement their internet searches. In addition, students report on whether they have paid subscriptions to various AI applications and evaluate just how important it is to them to develop their AI usage skills. Data in the report is presented in the aggregate and broken out by 19 variables including but not limited to age, academic major, gender, sexual orientation, SAT/GRE scores, college grades, race or ethnicity, religion, college tuition charged, public and private college status, and many other characteristics. Just a few of this 215-page report's Key Findings:

1. ChatGPT emerged as the most widely used AI tool with 64-77% of students reporting usage in the past month. Other AI tools such as Microsoft CoPilot (15-46%) and Gemini (13-60%) also saw notable adoption, while tools like Claude (5-77%), MidJourney (1-66%), and Grok (0-98%) had relatively low usage.
2. Use of ChatGPT was more popular at higher tuition institutions (79-35% usage at colleges with tuition above 20,000) compared to lower tuition colleges (53-93% at those under 6,000).
3. Students from major cities and those raised abroad showed higher usage of ChatGPT.
4. Microsoft CoPilot was most used in Engineering and Criminology, Law Enforcement majors.
5. Male students and those identifying as Hindu or politically moderate also showed higher AI adoption rates.
6. A

significant portion of students 59 24% considered learning generative AI somewhat important to very important with higher interest among private college students high income families and STEM majors      **Proceedings of the 2025**

Christou, 2025-04-08. The field of social research is characterized by its broad scope and interdisciplinary nature, encompassing the examination of human behaviour, societies, and various facets of social existence. However, it is influenced by numerous factors, including technological advancements. It is therefore no surprise that Artificial Intelligence (AI) has rapidly become a driving force, bringing about substantial transformations within the field. The use of AI-assisted tools and programmes for the collection, analysis, and interpretation of both quantitative and qualitative data is increasing at a remarkable pace. The implications of utilizing these applications are significant and noteworthy. While these technologies present numerous opportunities, it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement. With a focus on AI's research implications, this book explores various considerations and examples across different disciplines of social research. **Leveraging Today's Social Media** Mark D.
