# IBM watsonx Code Assistant for Z

Welcome to the watsonx Code Assistant for Z interactive demo.

IBM watsonx™ Code Assistant for Z is a generative AI-assisted product built to accelerate mainframe application modernization at lower cost and with less risk than today's alternatives.

The tracks below follow developers who work together to modernize a large COBOL application that is integral to their business. They generate and insert a detailed explanation as a comment into existing COBOL, refactor a COBOL service that is dispersed across the application, transform the COBOL service to Java with the help of generative AI, then validate the newly generated Java.

Select from the four tracks to begin your product tour.

<u>Surviving the Algorithm</u> Mike Liu,2025-09-02 Algorithms now shape what we see how we work and how we understand each other They amplify some voices bury others and quietly decide who gets noticed and who is left behind While many celebrate AI s efficiency and innovation the deeper story is the human struggle to survive in systems we do not control Drawing on decades of experience as a linguist educator and observer of political systems Mike Liu reveals the illusions behind AI s fluency and the dangers of mistaking convenience for consciousness From classrooms in Taiwan to boardrooms shaped by short term politics he shows how survival in the age of AI is not about running faster than machines but about seeing clearly through the illusions they create This book explores three urgent domains 1 Education under pressure Why cramming cultures and outdated teaching models collapse in an AI driven world 2 Politics of survival How factions media cycles and short term power struggles leave nations unprepared for disruption 3 Human projections onto machines Why we sense stubbornness trust illusions or hear a neural accent in AI s voice Surviving the Algorithm is not a technical manual It is a survival guide for educators policymakers students and anyone navigating a world where algorithms increasingly define value It challenges us to reclaim clarity purpose and meaning before the noise of machines drowns them out *AI in Social Studies Education* Christopher H.
