Artificial Intelligence in Real-time Control (AIRC-2000) I. J. Rudas, J. K. Tar, 2001 This Proceedings contains the papers presented at the 9th IFAC AIRC 2000 Symposium on Artificial Intelligence in Real Time Control 2000 held at Budapest Polytechnic Hungary on 2-4 October AIRC 2000 builds on the excellent reputation of previous meetings in the series for providing top quality papers in this important research field A positive development illustrated by this Proceedings is a new trend towards pragmatism in the research field Examples of this trend are an increase in the number of actual industrial applications support for more widespread use of new sophisticated technologies e.g. materials design further intertwining of artificial intelligence and control theory methods that reduces the reliance on blind faith still too often associated with AI methods Many things have changed since the first AIRC event in 1988 Two examples illustrate the change in the general attitude of the IFAC family in 1990 one of the major closing presentations of the IFAC World Congress warned the control community about the coming hordes of AI people In 1999 one of the plenary papers at the IFAC World Congress pointed out that the AI based methods form a natural extension of control theory to the class of non linear systems with incomplete information at least as far as the optimisation is concerned This contrast in attitudes shows how during the past decade many AI people have embraced control theory and many control people have learned the basics of AI This Proceedings serves to continue this excellent dialogue by providing many quality papers which link both fields
