**The Knockoff Economy** Kal Raustiala, Christopher Sprigman, 2012-08-15 From the shopping mall to the corner bistro knockoffs are everywhere in today's marketplace Conventional wisdom holds that copying kills creativity and that laws that protect against copies are essential to innovation and economic success But are copyrights and patents always necessary In *The Knockoff Economy* Kal Raustiala and Christopher Sprigman provocatively argue that creativity can not only survive in the face of copying but can thrive *The Knockoff Economy* approaches the question of incentives and innovation in a wholly new way by exploring creative fields where copying is generally legal such as fashion food and even professional football By uncovering these important but rarely studied industries Raustiala and Sprigman reveal a nuanced and fascinating relationship between imitation and innovation In some creative fields copying is kept in check through informal industry norms enforced by private sanctions In others the freedom to copy actually promotes creativity High fashion gave rise to the very term knockoff yet the freedom to imitate great designs only makes the fashion cycle run faster and forces the fashion industry to be even more creative Raustiala and Sprigman carry their analysis from food to font design to football plays to finance examining how and why each of these vibrant industries remains innovative even when imitation is common There is an important thread that ties all these instances together successful creative industries can evolve to the point where they become inoculated against and even profit from a world of free and easy copying And there are important lessons here for copyright focused industries like music and film that have struggled as digital technologies have made copying increasingly widespread and difficult to stop Raustiala and Sprigman's arguments have been making headlines in *The New Yorker* *The New York Times* *The Financial Times* *The Boston Globe* *Le Monde* and at the *Freakonomics* blog where they are regular contributors By looking where few had looked before at markets that fall outside normal IP law *The Knockoff Economy* opens up fascinating creative worlds And it demonstrates that not only is a great deal of innovation possible without intellectual property but that intellectual property's absence is sometimes better for innovation

**The Futurist** ,1999      **James Mill (1773-1836), John Rae (1796-1872), Edward West (1782-1828), Thomas Joplin (1790-1847)** Mark Blaug,1991 Mill Rae West and Joplin were until recently relegated to the footnotes of the history of economic thought In particular Rae s *New Principles on the Subject of Political Economy* was not reprinted until the 1960s and John Mill has been remembered more for his eldest son than for himself However as this volume demonstrates these four journalists and pamphleteers were important in pre empting and encouraging other economists most especially David Ricardo John Rae has been accredited with being a forerunner of the Austrian theory of capital James Mill made the first declaration in English of Say s theory of markets and quite possibly Ricardo s *Principle of Comparative Advantage* The currency and banking tracts written by Thomas Joplin in the 1820s and 1830s have been arduously mined by a variety of commentators as containing nuggets of later monetary doctrines and Edward West stated the theory of differential rent before Ricardo and did so in virtually the same form and language This collection does much to rehabilitate these lesser known figures in the history of economic thought      **The Times Index** ,2001 Indexes the Times and its supplements
