Navigating Telehealth for Speech and Language Therapists Rebekah Davies, 2022-07-20. There is so much to consider in any clinical consultation: identifying the individual is the one you expected, who is with the individual, which therapy intervention resources, signposting referrals, being cued in to responses for contextual information, evaluation and outcomes, planning next steps, and this is all before you throw virtual in the mix. This clinical companion presents 50 transferable, adaptable, practical, and accessible chapters for speech and language therapists and others working via remote consultations. Divided into four sections, the book covers: The remote practitioner, The remote rules, Creating a digital tool kit, A remotely possible future. Aimed at students encountering their first remote consultations, newly qualified clinicians with limited practical experience of virtual clinics, through to clinicians who are experienced in their own specialities but now need to transfer those skills to remote ways of delivery, this concise text will provide confidence and guidance for the reader. It will also prove useful to clinicians beyond speech and language as many of the skills and practical advice and guidance are applicable in specialities across a range of settings, both public and private healthcare and education.
