Advanced Sensors for Smart Healthcare Tuan Anh Nguyen, 2025-01-27 Advanced Sensors for Smart Healthcare provides an invaluable resource for researchers and healthcare practitioners who are eager to use technology to improve the lives of patients. Sections highlight data from sensor networks via the smart hospital framework including data insights and access. This book shows how the use of sensors to gather data on a patient's condition and the environment their care takes place in can allow healthcare professionals to monitor well-being and make informed decisions about treatment. Describes the fundamentals of sensors, biosensors, and smart hospitals. Explains how sensors and implanted nanodevices can be used in smart healthcare. Discusses how intelligent wireless medical sensor networks can be used for healthcare in the future. Companion volume to Sensor Networks for Smart Hospitals.

**Novel Applications of Carbon Based Nano-materials**  
Swamini Chopra, Kavita Pande, Vincent Shantha Kumar, Jitendra A. Sharma, 2022-11-03 There's plenty of room at the bottom. Richard Feynman's legendary sentence has practically teleported the world into the age of Nano technology over the last couple of decades. As nano materials started drawing extensive attention, the use of nano technology has opened many possibilities for humans. Carbon based nano materials are an example of such prominent class of materials which have an enormous potential to fit a wide range of applications ranging from the energy sector to aircraft and automotive sector to bio medical sector etc. The book Novel Applications of Carbon Based Nano Materials summarizes state of the art studies focusing on various applications of carbon allotropes considering the energy and environmental benefits and the socio economic impact of the developed systems all at the same time.

**Routledge Handbook of Disinformation and National Security**  
Rubén Arcos, Irena Chiru, Cristina Ivan, 2023-11-17 This interdisciplinary Handbook provides an in-depth analysis of the complex security phenomenon of disinformation and offers a toolkit to counter such tactics. Disinformation used to propagate false, inexact or out of context information is today a frequently used tool of political manipulation and information warfare both online and offline. This Handbook evidences a historical thread of continuing practices and modus operandi in overt state propaganda and covert information operations. Further, it attempts to unveil current methods used by propaganda actors, the inherent vulnerabilities they exploit in the fabric of democratic societies and last but not least to highlight current practices in countering disinformation and building resilient audiences. The Handbook is divided into six thematic sections. The first part provides a set of theoretical approaches to hostile influencing, disinformation and covert information operations. The second part looks at disinformation and propaganda in historical perspective offering case study analysis of disinformation and the third focuses on providing understanding of the contemporary challenges posed by disinformation and hostile influencing. The fourth part examines information and communication practices used for countering disinformation and building resilience. The fifth part analyses specific regional experiences in countering and deterring disinformation as well as international policy responses from transnational institutions and security practitioners. Finally, the sixth part offers a

practical toolkit for practitioners to counter disinformation and hostile influencing This handbook will be of much interest to students of national security propaganda studies media and communications studies intelligence studies and International Relations in general

**Plant signaling: Understanding the molecular crosstalk** Khalid Rehman Hakeem, Reiaz Ul Rehman, Inayatullah Tahir, 2013-10-25 Plant signalling has emerged as an integrated field which has become indispensable in recent times to study any biological process Over the last decade an enormous amount of information has been generated in this field and the advances in information technology gave birth to bioinformatics which has helped greatly in managing the galaxy of information It is now possible to view the different information s in a systems biology approach which has unravelled the association new processes and thus helped us enormously in understanding of the biological processes The present book is an attempt at understanding the plant signalling processes with different perspectives Even though the plants are sessile but there exists a tremendous interconnected network of perception at morphological physiological and molecular levels The impact of the surrounding environment in terms of abiotic and biotic stresses is significant in terms of its survival adaptation and productivity for the human welfare The plants possess a wide array of processes at the organ tissue and cellular levels which are governed by a plethora of molecules The molecules govern individual processes and these exists a cross talk between them to form a complex network of processes The book tries to envision how different processes are operating at different points in the life cycle of the plant
