Yampolskiy,2018-07-27 The history of robotics and artificial intelligence in many ways is also the history of humanity's attempts to control such technologies From the Golem of Prague to the military robots of modernity the debate continues as to what degree of independence such entities should have and how to make sure that they do not turn on us its inventors Numerous recent advancements in all aspects of research development and deployment of intelligent systems are well publicized but safety and security issues related to AI are rarely addressed This book is proposed to mitigate this fundamental problem It is comprised of chapters from leading AI Safety researchers addressing different aspects of the AI control problem as it relates to the development of safe and secure artificial intelligence The book is the first edited volume dedicated to addressing challenges of constructing safe and secure advanced machine intelligence The chapters vary in length and technical content from broad interest opinion essays to highly formalized algorithmic approaches to specific problems All chapters are self contained and could be read in any order or skipped without a loss of comprehension

Building Cyber Resilience against Hybrid Threats Mitko Bogdanoski,2022-08-15 Today's security environment is increasingly complex and unpredictable with cyber attacks and hybrid warfare blurring the lines between conventional and unconventional forms of conflict threats to energy security such as climate change and natural disasters and disruptive technologies like AI and quantum computing The challenge of adapting and responding to these threats calls for cooperation and novel ways of thinking This book presents 11 edited contributions from the NATO Advanced Training Course ATC Strengthening SEE Resilient Cyber Defense against Hybrid Threats STRENGTH held as an online event from 26 September 02 October 2021 The ATC brought together more than 60 military and civilian expert participants with 19 renowned

professors experts and practitioners from 14 NATO Member and Partner countries as speakers and lecturers The ATC aimed to raise awareness about the Alliance and the South Eastern Europe SEE evolving complex threat environment and establish the foundation for a long term multidisciplinary collaboration among defense and security experts and academia with the event serving as a first step in the creation of a SEE Network of defense security and academic experts which can work across borders linking state of the art of research and practice to build resilience against hybrid warfare capabilities Participants learned how state and non state actors acquire hybrid threats via cyberspace to achieve their strategic ends and took part in working groups moderated by invited speakers lecturers engaging in the productive discussion of questions related to the course topic The event concluded with briefings presenting relevant case studies and lessons learned

AI in Social Studies Education Christopher H. Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions Between utopian visions and apocalyptic predictions of AI's impact on education there is a need to thoughtfully consider what education in the age of AI can and should look like This volume focuses on the implications of AI technology for teachers in K 12 and university settings providing a careful look at its affordances and drawbacks for social studies curriculum and teaching Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI This book fills a critical need especially among educators to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno utopianism Whether skeptical or enthusiastic about AI every social studies educator will find something useful to their practice in this book

Book Features First ever compilation of AI considerations and strategies in the context of social studies education Nontechnical explanations of what AI can do and not do in practical educational contexts to enable educators to approach its use with careful judgment Advice for educators to help them assess future iterations of AI technology Critical considerations of AI across multiple contexts e g ethics equity multilingual learners cybersecurity Work from leaders in technology and social studies education across Canada and the United States
