**Generative AI in Higher Education** Cecilia Ka Yuk Chan, Tom Colloton, 2024-03-21 Chan and Colloton's book is one of the first to provide a comprehensive examination of the use and impact of ChatGPT and Generative AI (GenAI) in higher education. Since November 2022, every conversation in higher education has involved ChatGPT and its impact on all aspects of teaching and learning. The book explores the necessity of AI literacy tailored to professional contexts, assesses the strengths and weaknesses of incorporating ChatGPT in curriculum design, and delves into the transformation of assessment methods in the GenAI era. The authors introduce the Six Assessment Redesign Pivotal Strategies (SARPS) and an AI Assessment Integration Framework encouraging a learner-centric assessment model. The necessity for well-crafted AI educational policies is explored, as well as a blueprint for policy formulation in academic institutions. Technical enthusiasts are catered to with a deep dive into the mechanics behind GenAI, from the history of neural networks to the latest advances and applications of GenAI technologies. With an eye on the future of AI in education, this book will appeal to educators, students, and scholars interested in the wider societal implications and the transformative role of GenAI in pedagogy and research. The Open Access version of this book is available at [www.taylorfrancis.com](http://www.taylorfrancis.com) and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives (CC BY-NC-ND 4.0) license.

**AI in Social Studies Education** Christopher H. Clark, Cathryn van Kessel, 2025 The introduction of widely available generative AI tools has caused a frenzy of both positive and negative reactions. Between utopian visions and apocalyptic predictions of AI's impact on education, there is a need to thoughtfully consider what education in the age of AI can and should look like. This volume focuses on the implications of AI technology for teachers in K-12 and university settings, providing a careful look at its affordances and drawbacks for social studies curriculum and teaching. Scholars specializing in the field of social studies education provide information and practical ideas for teaching with current technology alongside frameworks for thinking about future iterations of AI. This book fills a critical need, especially among educators, to consider the current and potential future impacts of AI while avoiding the traps of alarmism or techno-utopianism. Whether skeptical or enthusiastic about AI, every social studies educator will find something useful to their practice in this book.

**Book Features:**

- First-ever compilation of AI considerations and strategies in the context of social studies education.
- Nontechnical explanations of what AI can do and not do in practical educational contexts to enable educators to approach its use with careful judgment.
- Advice for educators to help them assess future iterations of AI technology.
- Critical considerations of AI across multiple contexts, e.g., ethics, equity, multilingual learners, cybersecurity.

Work from leaders in technology and social studies education across Canada and the United States.
