Digital Health Care outside of Traditional Clinical Settings I. Glenn Cohen, Daniel B. Kramer, Julia Adler-Milstein, Carmel Shachar, 2024-04-30 Health care delivery is shifting away from the clinic and into the home Even prior to the COVID 19 pandemic the use of telehealth wearable sensors ambient surveillance and other products was on the rise In the coming years patients will increasingly interact with digital products at every stage of their care such as using wearable sensors to monitor changes in temperature or blood pressure conducting self directed testing before virtually meeting with a physician for a diagnosis and using smart pills to document their adherence to prescribed treatments This volume reflects on the explosion of at home digital health care and explores the ethical legal regulatory and reimbursement impacts of this shift away from the 20th century focus on clinics and hospitals towards a more modern health care model This title is also available as Open Access on Cambridge Core

Zaires, 2018-05-23 *The Common Gaze* Eric Stoddart, 2021-01-30 Our political spheres are riven with micro targeted political advertising that degrades the possibilities and incentive for shared respectful debate We are producers as well as consumers of data when we record our physical and sometimes our spiritual exercise on smartphone apps The algorithms which identify us granting us access to state and corporate provision are not objective but often deeply discriminatory against people of colour and those lower on socio economic scales Offering a ground breaking new perspective on one of the great concerns of our time Eric Stoddart examines everyday surveillance in the light of concern for the common good He

reveals the urgent need to challenge data gathering and analysis that weakens the social fabric by dividing people into categories largely based on inferred characteristics and interprets surveillance in relation to God's preferential option for those who are poor. The Common Gaze is a call not only for revised surveillance but for better ways of understanding how God sees. *B.A.S.I.C.*, 1968. **Science Citation Index**, 1994. Vols for 1964 have guides and journal lists. *Manipulated* Theresa Payton, 2024-04-23. Cybersecurity expert Theresa Payton tells battlefield stories from the global war being conducted through clicks, swipes, internet access, technical backdoors, and massive espionage schemes. She investigates the cyberwarriors who are planning tomorrow's attacks, weaving a fascinating yet bone-chilling tale of Artificial Intelligent mutations carrying out attacks without human intervention, deepfake videos that look real to the naked eye, and chatbots that beget other chatbots. Finally, Payton offers readers telltale signs that their most fundamental beliefs are being meddled with, and actions they can take or demand that corporations and elected officials must take before it is too late. Payton reveals how digital voting machines voting online and automatic registration may boost turnout but make us more vulnerable to cyberattacks. How trolls from Russia and other nations actively stroke discord among Americans in falsely generated controversies over race relations, vaccinations, fracking, and other social issues. Whether what we have uncovered from the Mueller investigation so far is only what they wanted us to know.
