What the Tech? Rachelle Dene Poth, 2025. With artificial intelligence, AI, augmented reality, AR, virtual reality, VR, blockchain, non fungible tokens, NFTs, the metaverse, and Web3 being used in the world of work and education, students need opportunities to learn about, explore, and create with emerging technologies. At the same time, educators need the right resources to stay current with the changes and be able to provide the guidance students need to develop the skills that are essential today and are likely to be in demand for the jobs of the future. Based on a course developed by the author, this book explores how to create impactful learning experiences so that students can apply their knowledge to real world problems, collaborate with peers from around the world, and develop critical thinking skills while expanding their understanding of the world and their place in it. Willing's Press Guide, 2004. Coverage of publications outside the UK and in non English languages expands steadily until in 1991 it occupies enough of the Guide to require publication in parts.
