external systems through a social and environmental justice lens Despite a growing focus on justice equity diversity and inclusion the imbalance of power remains within our institutions organizations and social systems To move the needle leaders can turn to Driving Justice Equity Diversity and Inclusion which explains developing a North Star vision and creating a strategy to redesign organizational process and systems as well as leveraging tools for data driven decision making It presents a framework to build an inclusive organization as well as a model to engage and support senior and middle management beginning the process of capacity building and systemic change By layering in AI and other technologies to support data driven decision making the book guides leaders in navigating their organization s journey along the maturity continuum to achieve their North Star vision of becoming a just and equitable organization The book also helps managers to Assess ecosystems and organizational systems that justice equity diversity and inclusion impact Take a deeper dive into transformational and operational components to gain insights on the deep systemic realignment of the North Star vision Identify and engage with diverse stakeholders to gain perspective and understand issues crucial for transformative change Leverage people centered design to create a process promoting diversity of voices and to better align outcomes with shared organizational vision Use data to drive decision making and reduce bias by removing intuition from the decision making process Leverage the book s frameworks to drive collaborative systemic change Adapt insights highlighted in multiple interviews with DEI practitioners Benefit from lessons learned and best practices featured in the book s case studies This book features a primer which is a quick reference guide to key terms concepts and definitions It helps to define justice equity diversity inclusion and other key terms such as unconscious bias stereotypes and microaggressions It also features a toolkit which includes checklists to help managers lead organizations to realize their own North Star vision

The Psychology of Health and Illness Leslie D. Frazier, 2025-06-30 The Psychology of Health and Illness is a thoroughly updated version of Leslie Frazier s previous textbook on health psychology which provides an engaging and contemporary approach to understanding health psychology from a truly international perspective Combining both biopsychosocial and lifespan developmental perspectives the book integrates core theory research and practice on global and cross cultural health issues It includes thoughtful and deliberately inclusive coverage of marginalized groups especially BIPOC LGBTQ and other underrepresented groups designed to raise diversity and racial consciousness in a globally integrative way Alongside classic health psychology concepts the author introduces students to cutting edge scientific and medical topics such as epigenetics the gut microbiome and the nonmedical use of prescription drugs The book also focuses on global public health and health disparities and promotes a strengths based approach to health rather than a deficits based approach It includes a wide range of pedagogical features including real world applications engaging anecdotes and case studies opportunities for self reflection and numerous text boxes This is essential reading for undergraduate students on Health Psychology courses as well as those in related fields such as nursing and the allied health professions

Innovation Sucks! Alan Watkins, Simon

May,2021-03-14 Businesses spend billions on innovation with very little to show for their investment or effort This book challenges some of the ingrained truths of innovation and suggests a different approach Innovation is not the creation of a novel idea It is the successful commercialisation of that novel idea Rather than starting with a costly time consuming problem assessment that seeks to push potential solutions through an innovation funnel an impeller approach starts with possible solutions and gets the market to pull the best ones forward so they can fail fast or flourish fast This approach is made possible by the addition of a bee a new type of integrative thinker who can harvest the existing knowledge from the meadow of experts Completely reversing the innovation process means organisations are much better placed to win in the market rather than focusing on finding theoretical solutions or clearing innovation stage gates In addition this approach also recognises that the people who shepherd the solution through the ideation and testing stage are not the same people who must then take that solution to market for successful commercialisation Given the current innovation failure rate coupled with the fact that society is beset with multiple wicked problems it s time to think differently and innovate innovation itself This book is essential reading for Heads of Innovation and Commercialisation Directors of Marketing Heads of New Product Development and New Service Development Strategy Directors Chief Technology Officers Government advisers and policy makers
