Recent Trends in Image Processing and Pattern Recognition KC Santosh, Aaisha Makkar, Myra Conway, Ashutosh K. Singh, Antoine Vacavant, Anas Abou el Kalam, Mohamed-Rafik Bouguelia, Ravindra Hegadi, 2024-01-29 This book constitutes the refereed proceedings of the 6th International Conference on Recent Trends in Image Processing and Pattern Recognition RTIP2R 2023 held in Derby UK during December 2023 in collaboration with the Applied AI Research Lab at the University of South Dakota The 62 full papers included in this book were carefully reviewed and selected from 216 submissions The papers are organized in the following topical sections Volume I Artificial intelligence and applied machine learning applied image processing and pattern recognition and biometrics and applications Volume II Healthcare informatics pattern recognition in blockchain IOT cyber plus network security and cryptography *Making Media Futures* Phillip H. Roth, Ana María Guzmán Olmos, Alin Olteanu, Stefan Bösch, 2025-04-22 *Making Media Futures* offers a multi perspectival exploration of how imaginaries and knowledge of the future are constructed in and through various media The volume addresses the discursive

dimensions of imaginaries and future visions as well as the impact of technological material and cultural conditions on the propagation of future discourses through media. Providing both theoretically detailed and empirically rich investigations, the contributions offer a wide range of cases spanning the century from the end of World War II until today and looking at examples from the Southern Hemisphere as well as the Global North. Bringing together scholars in media studies, science and technology studies, STS and the history and philosophy of technology, the chapters discuss future visions and imaginations of quantum computing, the uncertainty and impact of AI-based text-to-image generation, the ideology behind 5G telecommunication standards, imaginaries of the Internet of Things, transmedia strategies in global and local climate protests, how broadcast radio was implicated in the evangelical mission imaginary, and how early visions of automating scholarly information management shaped standards and ideals of academia. The volume thus complements existing approaches and analytical frameworks for the study of imaginaries and futures discourses with perspectives that are sensitive to the plurality of media-specific conditions and technologies. The book will interest students and scholars working in media studies, STS, history and philosophy, as well as at the intersection of engineering, humanities and social sciences on matters such as sustainability, ethics and responsible innovation.

The Routledge Companion to Remix Studies Eduardo Navas, Owen Gallagher, xtime burrough, 2025-03-27. The Routledge Companion to Remix Studies 2nd Edition comprises contemporary texts by key authors and artists who are active in the interdisciplinary field of remix studies. As an organic international movement, remix culture originated in the popular music culture of the 1970s and has since grown into a rich cultural activity encompassing numerous forms of media. The act of recombining pre-existing material continues to bring up pressing questions of authenticity, reception, authorship, copyright, and the techno-politics of media activism, especially with the emergence of artificial intelligence which relies on remix methods and principles for content production. This book approaches remix studies from various angles, including sections on history, aesthetics, ethics, politics, and practice, and offers theoretical chapters alongside case studies of remix projects. This second edition includes ten new chapters and nine revised chapters. Reprinted chapters from the first edition are updated with editorial prefaces. This volume offers in-depth insight for long-term relevance among the many interdisciplinary fields that rely on and also contribute to remix studies. This companion is a valuable resource for both researchers and remix practitioners as well as a teaching tool for instructors using remix practices in the classroom.
