Video Editing [Book Review], 2025-02-12 AI Revolution in Video Editing delves into the transformative impact of artificial intelligence on the video editing landscape. As the demand for dynamic content creation grows, traditional editing processes are evolving through the integration of cutting-edge technology. This book serves as a comprehensive guide for video editors, filmmakers, and content creators seeking to harness the power of AI to enhance their workflow and storytelling capabilities. Through the lens of automation and machine learning, the book explores the various AI algorithms and tools that are revolutionizing the editing process. From real-time editing and video enhancement to advanced visual effects and audio processing, readers will discover how AI-driven solutions are streamlining post-production tasks, increasing efficiency, and enabling creators to focus on their narrative vision. The text examines key topics such as data analysis and image recognition, illustrating how these technologies can be utilized to optimize workflows and elevate user experience. Furthermore, it highlights the significance of collaboration tools in fostering teamwork among creatives, ensuring that projects are completed more efficiently than ever before. In addition to practical insights, *AI Revolution in Video Editing* offers a glimpse into the future of the industry. It speculates on the potential advancements in deep learning and script analysis, as well as their implications for visual storytelling. By blending theory with real-world applications, this book empowers readers with knowledge and techniques to stay ahead in an ever-evolving field. Whether you are a seasoned professional or a budding enthusiast, this book is an essential resource for anyone looking to navigate the exciting intersection of technology and creativity in video production. Join the AI revolution and unlock new possibilities in video editing, where innovation meets artistic expression.

An Intelligent Video Editing Automate Framework Using AI and Computer Vision Haolin Xie, Yu Sun, 2022. At present, many video editing software have been created, but what they all have in common is that they require manual work to edit. And it takes a lot of time, and the user needs to watch each frame before editing. In this paper, we have developed a program about AI intelligence. The most important point of this software is that it can automatically focus the face of a person and edit only selected clips of the person to make a complete video. Users only need to prepare the video they want to edit and a photo of the main character. Then upload both to the software, and AI Intelligence will automatically edit it, providing the user with a way to download and save it. After editing the main character they need, we applied our application to an example video using the Marvel character Hawkeye as he appears in *End Game* and tried many experiments with the clip. Eventually, we tried many experiments with the clip and finally got a video of our selected character. The results show that this software saves the user a lot of time and is highly efficient. All operations are carried out by AI.

AI-Augmented Video Editor HEBooks, Editing video used to take forever. You'd spend more time cutting clips, syncing sound, and chasing consistency than actually telling your story. Enter AI, your new secret weapon. This book shows you how to use artificial intelligence to automate the boring parts of editing, so you can focus on what matters: crafting powerful, emotional, audience-grabbing content. From smart scene detection to auto-generated timelines, voice cloning, real-time

captions and even AI driven storytelling this guide gives you the tools to work faster smarter and more creatively than ever before No fluff No jargon Just actionable AI powered techniques that turn hours of work into minutes and good videos into unforgettable ones If you re ready to stop fighting the timeline and start shaping stories with AI by your side this is your roadmap Because the future of editing isn t just fast it s intelligent And it s already here
