Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle

data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct *Four Battlegrounds* offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order

COVID-19 PANDEMIC: Monitoring Technologies, Healthcare and Panic buying behaviour Dr. Safaa Najah Saud Al-Humairi, Dr. Nurzaafirah Mazlan, Associate Professor Dr. Arun Kumar Tarofder, Dr. Husniza Razalli, 2020-06-30 COVID 19 is an infectious disease that has become the biggest threat in the year 2020 so far It has dramatically changed the human life and the world economy The world has traumatized by the terrifying effect of this virus Not only the underdeveloped countries but also the most developed countries across the world USA Italy Spain Germany to name of few have witnessed the devastating effect of this lethal virus Therefore understanding the risk and management of this group of people is important for effective intervention and reducing the number of cases and fatality In spite of this COVID 19 imposes a heavy burden and costs on the health sector and consequently providing continuous monitoring by modern technologies will lead to a reduction of health costs and improve control of people's health practices management and prevention of this pandemic Employing the mobile and advanced health systems to offer a remote medical diagnosis and monitoring system will significantly reduce the cost of health care and appropriate management of performance especially in managing and spreading COVID 19 This book explores the effect of COVID 19 on human health in three essential cores medically technologically and economically The Internet of Things IoT and Artificial Intelligence AI includes three principal methods monitoring diagnosis and treatment were discussed IoT could achieve long term connectivity between hospitals patients and healthcare equipment by integrating sensors information technology artificial intelligence and innovative networking devices which could significantly enhance current medical conditions This book also provides a theoretical comparison between normal buying behaviour and panic buying behaviour Subsequently it explains the reasons for this behaviour Not only

reasons but the book also classified products based on this consumer buying pattern during this pandemic The book ends with a case study on the implementation of the AI algorithms in Malaysia and the achieved results were presented accordingly with a remarkable conclusion

Fatal Abstraction Darryl Campbell, 2025-04-08 A tech insider explains how capitalism and software development make for such a dangerous mix Software was supposed to radically improve society Outdated mechanical systems would be easily replaced programs like PowerPoint would make information flow more freely social media platforms like Facebook would bring people together and generative AI would solve the world's greatest ills Yet in practice few of the systems we looked to with such high hopes have lived up to their fundamental mandate In fact in too many cases they've made things worse exposing us to immense risk at the societal and the individual levels How did we get to this point In *Fatal Abstraction* Darryl Campbell shows that the problem is managerial software programs created and overseen not by engineers but by professional managers with only the most superficial knowledge of technology itself The managerial ethos dominates the modern tech industry from its globe spanning giants all the way down to its trendy startups It demands that corporate leaders should be specialists in business rather than experts in their company's field that they manage their companies exclusively through the abstractions of finance and that profit margins must take priority over developing a quality product that is safe for the consumer and beneficial for society These corporations rush the development process and package cheap unproven potentially dangerous software inside sleek and shiny new devices As Campbell demonstrates the problem with software is distinct from that of other consumer products because of how quickly it can scale to the dimensions of the world itself and because its inner workings resist the efforts of many professional managers to understand it with their limited technical background A former tech worker himself Campbell shows how managerial software fails and when it does what sorts of disastrous consequences ensue from the Boeing 737 MAX crashes to a deadly self-driving car to PowerPoint propaganda and beyond Yet just because the tech industry is currently breaking its core promise does not mean the industry cannot change or that the risks posed by managerial software should necessarily persist into the future Campbell argues that the solution is tech workers with actual expertise establishing industry wide principles of ethics and safety that corporations would be forced to follow *Fatal Abstraction* is a stirring rebuke of the tech industry's current managerial excesses and also a hopeful glimpse of what a world shaped by good software can offer
