Cats Of The World:

Wild Cats of the World Mel Sunquist, Fiona Sunquist, 2017-05-15 Did you know that European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow *Wild Cats of the World* is a treasure trove of answers to questions like these and many others for anyone who's interested in learning more about the world's felids including the ones with whom we share our homes Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source many of them quite difficult to find including scientific papers descriptions of hunts archeological findings observations by naturalists and travelers reports from government agencies and newsletters from a wide variety of organizations Weaving information from these sources together with their own experiences observing wild cats around the world the Sunquists have created the most comprehensive reference on felids available Each of their accounts of the 36 species of cat contains a description of the cat including human interactions with it as well as detailed data on its distribution ecology and behavior status in the wild and efforts to conserve it Numerous photographs including more than 40 in full color illustrate these accounts Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia *Wild Cats of the World* will fascinate and educate felid fans of any stripe or spot

Wild Cats of the World Charles Albert Walter Guggisberg, 1975 ***Wild Cats of the World*** David Alderton, 1993 This is a guide for amateurs which describes how the major spider families court catch prey feed and defend themselves

Wild Cats of the World Barbara Sleeper, 1995 Portrait of the world's 37 species of wild cats *Wild Cats of the World* Luke Hunter, 2015-09-24 *Wild Cats of the World* provides detailed accounts for all 38 species of wild cat accompanied by magnificent artwork and stunning photography From the rabbit sized Black footed Cat of southern Africa to

bear killing Amur tigers of the Russian Far East the 38 members of the Cat Family include some of the world's most fascinating and magnificent species on earth. Supremely adapted for the kill, all cats are obligate carnivores; they survive only by preying upon other animals and they have become one of evolution's most successful predatory lineages of mammals. *Wild Cats of the World* explores the spectacular Cat Family in unprecedented depth. Drawing on thousands of scientific papers and direct observations in the field, each species is profiled at length, covering all aspects of feline behaviour and ecology. The book is profusely illustrated with colour plates, black and white sketches showing important aspects of cat life, and accurate images of every species' skull. Over 400 spectacular photographs are included, many of them showing extremely rare and little-known cats published here for the first time. Each profile includes an up-to-date range map and explains the most current science on how cats are classified and related to each other, including some very recent surprising discoveries. Despite their great evolutionary success, the challenges facing felids in the modern world are profound. Only one, the ubiquitous domestic cat, does not require dedicated conservation action to ensure survival for the next century. The book also explores the current conservation issues facing wild cats, the increasingly perilous status of many species, and how they can be saved.
