Causes of Climate Change Tracy Sue Walker,2022-08-01 Climate change is the cause of many major issues affecting people around the globe today from floods to hurricanes to heat waves But what causes climate change Discover the science behind the greenhouse effect where greenhouse gases come from and what you can do to stop the causes of climate change

Global Warming Ishita Haldar, Global warming and climate change have become an issue of great concern Now as the world is getting technologically and industrially more advanced resulting in the setting up of huge factories the environmental pollution is heading towards alarming levels It is obvious that more factories mean more pollution and more carbon emissions which highly aggravate global warming Keeping this in view the policy makers from all over the world have decided to unite and chalk out a plan to keep the adverse effects of global warming within safety limits This book is also an effort in this direction Defining in detail the major aspects of global warming it discusses at length its causes and effects Taking a close look at the global response to contain global warming it also explains the important provisions of Copenhagen Summit Kyoto Protocol and Post Kyoto Protocol Negotiations on Green house Gas Emissions

Causes of Climate Change Ashok Malik,2008 This book the first in the series of this four book volume on climate change deals exclusively with the exploration of the causes of climate change The increase in the emission of green house gases and the subsequent enhanced greenhouse effect is the root of this problem and the human activities and processes which cause these are quite comprehensively discussed Trends in the increase in the concentrations of these green house gases are detailed with the use of tables and graphs and pie charts have also been included to show the contribution of different gases to global warming The sc

What's Climate Change? Robert M. Hamilton,2017-12-15 Climate change is an issue that affects all living things on Earth but the specifics of the issue are often spoken and written about using complex scientific language making it difficult for young people to fully grasp why

it is such a critical problem When presented in an accessible way however readers are able to gain a deeper understanding of the causes and effects of climate change as well as why they should care about this issue Striking full color photographs detailed fact boxes and informative graphic organizers help readers as they explore this hot topic Climate Change: Causes Gr. 5-8 Erika Gasper-Gombatz,2019-04-17 Provide students with insight into the science of our atmosphere and the effects of humanity s actions on the Earth System Our resource gives a scientific perspective on climate change that will help students separate fact from fiction Investigate the different layers of the atmosphere Conduct an experiment to see just how an object s color affects how much radiation it absorbs Find out what effect rising temperatures have on Earth s oceans Create your own model of the carbon cycle Explain how the residence time of methane in the atmosphere could help people fight climate change Learn what effects ozone has on human health See firsthand how nitrogen fixing bacteria can replace nitrogen fertilizers Figure out why synthetic gases were banned and how long their effects will stay in the atmosphere Written to Bloom s Taxonomy and STEAM initiatives additional hands on activities crossword word search comprehension quiz and answer key are also included **Causes and Issues of Climate Change and Global Warming** Selina Kolls,2016-08-30 Essay from the year 2016 in the subject Politics International Politics Environmental Policy grade 97 language English abstract As a consultant in energy and sustainable development for the UN your role is to provide a guideline and information on issues connected to the oil and gas production and applications as one of the major causes for climate change and global warming For this reason sustainable development of oil and gas industries is an important factor for example in how oil and gas companies are able to divert into cleaner sources of sustainable energy and the consequent impacts on the environment in general and the climate in particular Currently the greatest worry among the environmentalists and the UN is the huge concern regarding the present rising levels of the earth s temperatures Among their top concern is the continued effects of greenhouse gases to the atmosphere that continually contribute to the global warming of the earth More so the increased and exploitative usage of the fossil fuels in the modern industries contributes to the increase in the global temperatures The reason of the worries is the fact that the over accumulation of the carbon IV oxide in the atmosphere continually deteriorates the climatic balance of the earth Additionally the top reasons causing the worries of the global warming effects on the Earth arise from the provision that the factors leading to the global warming and causing the upsetting climatic changes are synthetic and human beings contribute a huge role to the destruction of the atmosphere The following write up aims to focus on the various contributing factors of the climate change and those causing global warming More so the paper will address the challenges and benefits that would arise if the conventional energy producers would consider seeking greener or renewable sources for their energy with a particular focus on oil and petroleum companies In addition the paper will have s **Small Gases, Big Effect** David Nelles,Christian Serrer,2021-03-25 The international bestseller that gives you the facts about climate change When students David Nelles and Christian Serrer
