Celestial Navigation Step By Step:

Celestial Navigation Step by Step Warren Norville, 1973 The Practical Guide to Celestial Navigation Phil Somerville, 2021-10-14 THIS EBOOK EDITION IS DESIGNED TO BE EXPERIENCED ON COLOUR DEVICES The practical guide to celestial navigation know what to do step by step understand why you re doing it and be confident that you can put it into practice when on board Did you know that a person standing on the equator is effectively travelling at 900mph And did you know that you can use this information to work out where you are in the world to an accuracy of about 3 or 4 miles No GPS no computers Just a sextant some tables from an Almanac and the knowledge in this book It s the only back up if the GPS goes down so it s a matter of safety If you want to qualify as a commercial skipper superyacht captain you need to know how to carry out celestial navigation And if you want to pass the RYA Ocean Yachtmaster™ exam you need to know it too It s a major stumbling block for many sailors wanting or needing to take their next qualifications and the other books on the market are complex and often assume some prior understanding This book fulfils the need for a clear explanation of celestial navigation illustrated with colour diagrams and including unique checklist sheets to enable you to repeat all those calculations you learned back at home when you re on deck Without overwhelming the reader with a load of theory from the off the author breaks down what you need to do step by step explaining why at every point giving the information context and making it more interesting and memorable He has trained students in this subject for years and here he s able to use his experiences of what works and what are the common pitfalls he even includes a troubleshooting chapter near the end going through errors commonly made and how to spot them The objective is that readers will finish the book not only knowing what to do but really understanding why and being able to make sense of it all again later rather than just getting through and exam and finding themselves at a loss when on deck The author also includes time tested proformas quick reference sheets that sailors can refer to when they come to putting the theory into practice on board avoiding the terrifying cold start that most sailors experience when they suddenly need to put their theoretical knowledge to the test in the real world

Self-taught Navigation Robert Yates Kittredge, 1973 **Starpath Celestial Navigation Work Forms: For All Sights and Tables, with Complete Instructions and Examples** David Burch, 2018-10-04 Starpath work forms for sight reduction procedures in celestial navigation have been used by tens of thousands of navigators for over forty years Designed to make the sight reduction of all celestial bodies flow in the same logical procedure that matches how data are presented in the Nautical Almanac and in the various sight reduction tables There is always a place for adjusting angles to base values as needed plus reminders on the signs of the values Intermediate results are grouped for convenient entrance to the tables and for plotting the resulting lines of position Once a few examples have been worked the forms alone guide you through the process Even after being away from cel nav for long periods the forms are a quick refresher that gets you back up to speed quickly Detailed instructions are included with warnings about common errors Forms included are Form 104 Sight reduction

of all bodies using Pub 249 Vols 2 and 3 or Pub 229 all volumes The workhorse of the Starpath approach to celestial navigation Form 111 Sight Reduction of stars using Pub 249 Vol 1 Selected Stars Form 106 Sight reduction of all bodies using the NAO Sight Reduction Tables included in the Nautical Almanac This form is a unique tool that makes these tables that every navigator has as easy to use as any other method Form 108 A combination of Form 104 and Form 106 for those who choose the NAO Tables as standard Form 109 For completing multiple solar index corrections and averaging them This is a high accuracy method praised since the formative days of celestial navigation in the late 1700s but not used as often as it could be these days Forms 107 110 and 117 cover latitude and longitude at noon as well as latitude by Polaris These are basic procedures but many new to cel nav find them helpful to get started and they are instant refreshers after being away from the subjects for some time
