Subject, Definition, Activity Tommaso Alpina, 2021-02-08 This book offers for the first time a comprehensive study of the reception and reworking of the Peripatetic theory of the soul in the Kit b al Nafs Book of the Soul by Avicenna d 1037 This study seeks to frame Avicenna's science of the soul or psychology by focusing on three key concepts subject definition and activity The examination of these concepts will disclose

the twofold consideration of the soul in Avicenna's psychology Besides the general approach to the soul of sublunary living beings which is the formal principle of the body Avicenna's psychology also exhibits a specific orientation towards the soul in itself i.e. the human rational soul that considered in isolation from the body is a self-subsistent substance identical with the theoretical intellect and capable of surviving severance from the body These two investigations demonstrate the coexistence in Avicenna's psychology of a more specific and less physical science *psychologia specialis* within a more general and overall physical one *psychologia generalis* **Method, Structure, and Development in al-Fārābī's Cosmology** Damien

Janos, 2012-03-02 This study the first monograph devoted exclusively to al-Fārābī's cosmology provides a new interpretation of this thinker's philosophical development through an analysis of the Greek and Arabic sources and a contextualization of his life and thought in the cultural and intellectual milieu of his time It discusses key cosmological and metaphysical concepts articulated in his works with a special focus on celestial causation, intellection and motion This book also examines al-Fārābī's cosmological method and particularly the connection between astronomy, physics and metaphysics The result is a reassessment of al-Fārābī's cosmology vis-à-vis late antique Greek philosophical trends and a clearer understanding of how it creatively adapted and transformed this legacy to establish a new cosmological paradigm in Arabic thought Cosmology

and Biology in Ancient Philosophy Ricardo Salles, 2021-06-10 In antiquity living beings are inextricably linked to the cosmos as a whole Ancient biology and cosmology depend upon one another and therefore a complete understanding of one requires a full account of the other This volume addresses many philosophical issues that arise from this double relation Does the cosmos have a soul of its own Why? Is either of these two disciplines more basic than the other or are they at the same explanatory level What is the relationship between living things and the cosmos as a whole If the cosmos is an animate intelligent being what is the nature of its thoughts and actions How do these relate to our own thoughts and actions Do they pose a threat to our autonomy as subjects and agents And what is the place of zoogony in cosmogony A distinguished international team of contributors provides original essays discussing these questions **The American Journal of**

**Within** Susan Wasserman, 2013 Using the rich symbolism woven into astrology The Celestial Chorus Within brings to life twelve archetypal characters and energies who sing, dance and dialogue within each of us As we come to know ourselves as a cast of characters we recognize we are profoundly complex, multifaceted and unique Written from the perspective that we are conscious beings unfolding this exploration into astrology facilitates awareness of self and others as the embodiment of shadow and light tension and ease and tendencies that are veiled or apparent Used wisely psychological astrology generates
