Technologies Conference (FTC) 2025, Volume 2 Kohei Arai, Artificial Intelligence in Education: The Power and Dangers of ChatGPT in the Classroom Amina Al-Marzouqi, Said A. Salloum, Mohammed Al-Saidat, Ahmed Aburayya, Babeet Gupta, 2024-03-29 This book aims to bring together a collection of innovative and cutting edge research that addresses the various challenges in the application and theoretical aspects of ChatGPT in education ChatGPT is a large language model developed by OpenAI that has the ability to generate human like text based on a prompt This has significant potential for use in the field of education as it allows for the creation of personalized interactive learning experiences automating assessment and grading and more In e learning ChatGPT is used to provide instant feedback and support to students as well as generate

interactive conversations in the target language for language learning. It is also integrated with existing learning management systems and educational technology platforms to enhance their capabilities. In research, ChatGPT is used for natural language processing and sentiment analysis to gather insights on student learning experiences and educational outcomes. However, it is important to note that there are also ethical and privacy concerns that come with using language models like ChatGPT in education, such as data protection and the potential for bias. Overall, the use of ChatGPT in education has the potential to revolutionize the way we learn, teach, and access information.

The book seeks to publish original manuscripts that cover a broad range of topics from the development of new chatbot technologies and their integration into the classroom to the examination of the ethical and pedagogical implications of these systems. By compiling the latest developments in the field and highlighting new areas for exploration, this book provides valuable insights and perspectives for researchers, educators, and practitioners working in the field of ChatGPT and education. The ultimate goal is to advance the understanding of ChatGPT and its role in education and to promote its effective and responsible use in the classroom and beyond.

Learn AI-Assisted Python Programming, Second Edition Leo Porter, Daniel Zingaro, 2024-10-29

See how an AI assistant can bring your ideas to life immediately. Once to be a programmer, you had to write every line of code yourself. Now tools like GitHub Copilot can instantly generate working programs based on your description in plain English. An instant bestseller, *Learn AI-Assisted Python Programming* has taught thousands of aspiring programmers how to write Python the easy way, with the help of AI. It's perfect for beginners or anyone who's struggled with the steep learning curve of traditional programming. In *Learn AI-Assisted Python Programming, Second Edition*, you'll learn how to write fun and useful Python applications with no programming experience required. Use the GitHub Copilot AI coding assistant to create Python programs. Write prompts that tell Copilot exactly what to do. Read Python code and understand what it does. Test your programs to make sure they work the way you want them to. Fix code with prompt engineering or human tweaks. Apply Python creatively to help out on the job. AI moves fast, and so the new edition of *Learn AI-Assisted Python Programming, Second Edition* is fully updated to take advantage of the latest models and AI coding tools. Written by two esteemed computer science university professors, it teaches you everything you need to start programming Python in an AI-first world. You'll learn skills you can use to create working apps for data analysis, automating tedious tasks, and even video games. Plus, in this new edition, you'll find groundbreaking techniques for breaking down big software projects into smaller tasks AI can easily achieve.

Foreword by Beth Simon. About the technology: The way people write computer programs has changed forever. Using GitHub Copilot, you describe in plain English what you want your program to do, and the AI generates it instantly. About the book: This book shows you how to create and improve Python programs using AI, even if you've never written a line of computer code before. Spend less time on the slow, low-level programming details and instead learn how an AI assistant can bring your ideas to life immediately. As you go, you'll even learn enough of the Python language to understand and improve what your AI assistant

creates What's inside Prompts for working code Tweak code manually and with AI help AI test your programs Let AI handle tedious details About the reader If you can move files around on your computer and install new programs you can learn to write useful software About the author Dr Leo Porter is a Teaching Professor at UC San Diego Dr Daniel Zingaro is an Associate Teaching Professor at the University of Toronto The technical editor on this book was Peter Morgan Table of Contents 1 Introducing AI assisted programming with GitHub Copilot 2 Getting started with Copilot 3 Designing functions 4 Reading Python code Part 1 5 Reading Python code Part 2 6 Testing and prompt engineering 7 Problem decomposition 8 Debugging and better understanding your code 9 Automating tedious tasks 10 Making some games 11 Creating an authorship identification program 12 Future directions

Beyond Code Daniel Plate, James Hutson, 2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines This book investigates how tools such as Cursor AI GitHub Copilot and Replit's Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation intelligent debugging and interactive project based learning Bridging the gap between theoretical instruction and practical application the book serves as both a guide and a critical framework for integrating generative AI into curricula It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models This resource is essential for instructors seeking to demystify coding promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom
