[Novel and Intelligent Digital Systems: Proceedings of the 4th International Conference \(NiDS 2024\)](#) Phivos Mylonas, Dimitris Kardaras, Jaime Caro, 2024-10-15 This book compiles the research findings presented at

the 4th International Conference on Novel Intelligent Digital Systems NiDS 2024 which took place in Athens Greece on September 25-27, 2024, hosted by the University of West Attica. NiDS 2024 was conducted in a hybrid format offering participants the flexibility to join either online or in person. The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence (AI) in software development. It served as a platform for high quality research, providing a space to explore challenges and innovations in AI. NiDS 2024 referred to experts, researchers and scholars in artificial and computational intelligence as well as the broader field of computer science, offering insights into interconnected and complementary areas. By promoting the exchange of ideas, the conference aimed to strengthen and expand the network of researchers, academics and industry professionals.

Confronting Digital Dilemmas in Translator and Interpreter Training Pavol Šveda, Martin Djovčoš, Emília Perez, 2025-10-30. This collection explores the challenges and opportunities brought on by developments in emergent technologies for translator and interpreter training. Given the growing role of language professionals as mediators in an increasingly fragmented and globalized world, this book offers an in-depth look at the present and future of translator and interpreter training amidst these changes. Featuring perspectives from established and up-and-coming scholars, the volume is organized in three sections taking in turn different dimensions of the current training landscape. These parts consider key topics including theoretical foundations and pedagogical innovations, ethical considerations and social responsibility, and ways forward for adapting training programs to better grapple with new tools. Taken as a whole, this book will be a useful resource for students and scholars in translation and interpreting studies as well as practicing professionals.

AI-Powered English Teaching Shukla, Ankit, Meeprom, Benjaporn, Khunasathitchai, Kongkiat, Yadav, Nagendra, 2025-06-25. Artificial intelligence (AI) is transforming English language education by enabling personalized, adaptive and efficient learning experiences. By automating routine tasks and offering real-time feedback, AI empowers educators to focus on fostering creativity, cultural understanding and critical thinking. As English remains a key global communication tool, AI-driven teaching methods help make high quality education more accessible and inclusive across diverse learning environments. This shift not only enhances student engagement and outcomes but also redefines the role of educators in a rapidly evolving digital age. AI-Powered English Teaching explores the transformative potential of AI in reshaping how English is taught and learned. By offering practical insights, theoretical frameworks and evidence-based strategies, this book bridges the gap between emerging AI technologies and their application in educational settings. Covering topics such as automated feedback, foreign language skills and writing motivation, this book is an excellent resource for English language educators, curriculum developers, educational technology professionals, academicians, teacher trainers, education policymakers and more.

Understanding Media Psychology Gayle S. Stever, David C. Giles, J. David Cohen, Mary E. Myers, 2025-07-23. Understanding Media Psychology is an authoritative introductory textbook on the growing field of media psychology. Providing an overview of topics in the field, it summarizes key

concepts and theories and considers the importance of media psychology in today's society. The second edition of this bestselling textbook has been fully updated to reflect the changing landscape of media psychology. The new edition features a brand new chapter on news and political media as well as increased focus on AI and new forms of social media. It covers core areas such as positive media psychology, audience research, and the effect of gaming, violence, advertising, and pornography, critically engaging with contemporary discussions around propaganda, fake news, deepfakes, and how media and health psychology interacted during the COVID-19 pandemic and beyond. Written by a team of expert authors, this book will help readers understand the structures, influences, and theories around media psychology. Particular care is also given to addressing the interaction between issues of social justice and the media, as well as the effects media has on both the members of marginalized groups and how those groups are perceived. A student website and instructor resources provide further ways to engage with the content and support teaching and learning. Containing a range of pedagogical features throughout to aid teaching and student learning, including vocabulary and key terms, discussion questions, and boxed examples, this is an essential resource for media psychology courses at the undergraduate and introductory master's levels globally.
