Caught By The Sea:

Caught by the Sea Gary Paulsen, 2007-12-18 Another such wave could easily be the end of us I had to do something fix something save the boat save myself But what Gary Paulsen takes readers along on his maiden voyage proving that ignorance can be bliss Also really stupid and incredibly dangerous He tells of boats that have owned him good bad and beloved and how they got him through terrifying storms that he survived by sheer luck His spare prose conjures up shark surprises and killer waves as well as moonlight on the sea and makes readers feel what it s like to sail under the stars or to lie at anchor in a tropical lagoon where dolphins leap bathed in silver Falling in love with the ocean set Gary Paulsen on a lifelong learning curve and readers will understand why his passion has lasted to this day Caught by the Sea

Squires, Mahfuzuddin Ahmed, 2011-07-31 Across the Pacific populations of some species of sea turtles face extinction unless recent dramatic declines are reversed The continuing decline of leatherbacks and loggerheads in particular illustrates the limitations of the current gradual and unilateral approach to conservation Recovery requires instead a holistic solution that addresses all sources of mortality throughout the entire life history and habitat use of these transnational populations Historically conservation efforts have focused on nesting sites to protect eggs and breeding females mortality from coastal and high seas fisheries was not addressed In the past five years these recovery efforts have widened to include rigorously curtailing fishing and technological fixes that lower rates of incidental sea turtle deaths during fishing Although each of these approaches shows promise it has become increasingly clear that they alone will not recover severely depleted populations Recognizing the urgency of the problem this book presents ideas and case studies by conservation biologists economists marine life policy experts fishing industry and fisheries professionals management specialists and development assistance

researchers It provides a new synthesis and blueprint for action that shifts the paradigm from piecemeal and unilateral conservation to a more holistic and multilateral approach to the recovery of Pacific sea turtle populations

Decline of the Steller Sea Lion in Alaskan Waters National Research Council, Division on Earth and Life Studies, Polar Research Board, Ocean Studies Board, Committee on the Alaska Groundfish Fishery and Steller Sea Lions, 2003-05-04 For an unknown reason the Steller sea lion population in Alaska has declined by 80% over the past three decades In 2001 the National Research Council began a study to assess the many hypotheses proposed to explain the sea lion decline including insufficient food due to fishing or the late 1970s climate regime shift a disease epidemic pollution illegal shooting subsistence harvest and predation by killer whales or sharks The report s analysis indicates that the population decline cannot be explained only by a decreased availability of food hence other factors such as predation and illegal shooting deserve further study The report recommends a management strategy that could help determine the impact of fisheries on sea lion survival establishing open and closed fishing areas around sea lion rookeries This strategy would allow researchers to study sea lions in relatively controlled contrasting environments Experimental area closures will help fill some short term data gaps but long term monitoring will be required to understand why sea lions are at a fraction of their former abundance

Careful Release Protocols for Sea Turtle Release with Minimal Injury Sheryan Patricia Epperly, 2004 Sea turtle handling protocols prepared by NOAA Fisheries Southeast Fisheries Science Center describe the tools and techniques for removing fishing gear from incidentally captured sea turtles and other bycatch species The required and recommended equipment and techniques described here are intended to reduce sea turtle injury and promote post release survival Although these guidelines were written for sea turtle release this equipment should also be used for all bycatch species to reduce mortality
