Causal Connectives Have Presuppositions Effects On Coherence And Discourse Structure:

   Causal Connectives Have Presuppositions Luuk Lagerwerf,1998   *How to express yourself with a causal connective* Mirna Pit,2022-03-07 The Dutch German and French languages display a variety of regularly used connectives all of which introduce causes arguments or reasons such as Dutch omdat want and aangezien German weil denn and da and French parce que car and puisque Why should languages have different connectives to express the notion of backward causality The central argument developed in this book is that different connectives express different degrees of subjectivity In a series of corpus analyses it is shown that the degree of subjectivity of the main participant involved in the causal relation strongly predicts the occurrence of one or another connective Hence language users have at their disposal connectives of varying degrees of subjectivity In an analysis of judiciary sentences it is revealed that speakers are actually sensitive of this semantic distinction and sometimes even exploit it for their communicative purposes in order to conceal their subjective involvement judges prefer objective over subjective connectives This volume makes a contribution to the study of language in use by applying empirical methods to authentic language data It will be of interest to anyone concerned with discourse coherence perspective and subjectivity corpus linguistics and cross linguistic analyses   **Modality and Theory of Mind Elements across Languages** Werner Abraham,Elisabeth Leiss,2012-05-29 Modality is the way a speaker modifies her declaratives and other speech acts to optimally assess the common ground of knowledge and belief of the addressee with the aim to optimally achieve understanding and an assessment of relevant information exchange In languages such as German and other Germanic languages outside of English this may happen in covert terms Main categories used for this purpose are modal adverbials modal particles and modal verbs Epistemic uses of modal verbs like German sollen cover evidential reportative information simultaneously providing the source of the information Methodologically description and explanation rest on Karl B hler s concept of Origo as well as Roman Jakobson s concept of shifter Typologically East Asian languages such as Japanese pursue these semasiological fundaments far more closely than the European languages In particular Japanese has to mark the source of a statement in the declarative mode such that the reliability may be assessed by the hearer The contributions in this collection provide insight into these modal techniques   **Constructions of Intersubjectivity** Arie Verhagen,2005-05-26 Constructions of Intersubjectivity shows that the meaning of grammatical constructions often has more to do with the human cognitive capacity for taking other peoples points of view than with describing the world Treating pragmatics semantics and syntax in parallel and integrating insights from linguistics psychology and animal communication Arie Verhagen develops a new understanding of linguistic communication In doing so he shows the continuity between languageand animal communication and reveals the nature of human linguistic specialization Professor Verhagen uses Dutch and English data from a wide variety of sources and considers the contributions of grammar to the coherence of discourse He argues that important problems in semantics and syntax may be resolved if language is understood as an instrument for

exerting influence and coordinating different perspectives The grammatical phenomena he discusses include negative expressions the let alone construction complementation constructions and discourse connectives This powerfully argued and original explanation of the nature and operation of communication will interest a wide range of scholars and advanced students in linguistics cognitive science and human evolution **Language and Memory** Hanna Pishwa,2011-06-24 This volume presents an entirely new expanded cognitive view of language by examining linguistic structure and its use in communication from the point of view of memory thus providing a novel way of analysing language The fourteen chapters authored by linguists and psychologists show the need for such an approach and illustrate that the properties of numerous linguistic structures reflect those of memory in various ways Many different methodologies are presented because of the interdisciplinary nature of the volume without reducing the comprehensibility and comparability of the contributions Core linguistic areas are discussed in the contributions embracing syntax semantics pragmatics and discourse analysis psychological aspects are restricted to memory systems and their properties The introduction provides a concise overview of memory and then three sections examine linguistic phenomena from various angles relating them to memory In the first section the contributions emphasize the issue of syntagmatic vs paradigmatic organization in various linguistic phenomena with a focus on syntax and their locus in memory The contributions in the second part investigate structures with non fixed functions showing that they tend to be connected to a certain submemory sharing their features such as subjectivity and evaluation The concern of the last section is discourse comprising coherence evidentiality politeness and persuasion The book should be stimulating for researchers and students of linguistic core areas as well as those occupied with developmental aspects and theoretical aspects of language It also provides new insights into methods of analysis both in linguistics and in cognitive psychology The individual chapters are comprehensible to linguists who have no background in psychology and to psychologists who have to background in linguistics **Language, Culture, Computation: Computing for the Humanities, Law, and Narratives** Nachum Dershowitz,Ephraim Nissan,2014-12-04 This Festschrift volume is published in Honor of Yaacov Choueka on the occasion of this 75th birthday The present three volumes liber amicorum several years in gestation honours this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours Yaacov s research has had a major impact not only within the walls of academia but also in the daily life of lay users of such technology that originated from his research An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s a project in which he is currently involved is proving to be a sensation as will become apparent from what follows Yaacov Choueka began his research career in the theory of computer science dealing with basic questions regarding the relation between mathematical logic and automata theory From formal languages Yaacov moved to natural languages He was a founder of natural language processing in Israel developing numerous tools for Hebrew He is best known for his primary role together with Aviezri Fraenkel in the

development of the Responsa Project one of the earliest fulltext retrieval systems in the world More recently he has headed the Friedberg Genizah Project which is bringing the treasures of the Cairo Genizah into the Digital Age This second part of the three volume set covers a range of topics related to the application of information technology in humanities law and narratives The papers are grouped in topical sections on humanities computing narratives and their formal representation history of ideas the numerate disciplines law computer law and legal computing **Causality Marking Across Levels of Language Structure** Ninne Maria Stukker,2005 **Syntax of Dutch** Hans Broekhuis,Norbert Corver,2025-10-01 The multi volume work Syntax of Dutch presents a synthesis of current thinking on Dutch syntax The text of the seven already available volumes was written between 1995 and 2015 and issued in print between 2012 and 2016 The various volumes are primarily concerned with the description of the Dutch language and only where this is relevant with linguistic theory They will be an indispensable resource for researchers and advanced students of languages and linguistics interested in the Dutch language This volume is the final one of the series and addresses issues relating to coordination It contains three chapters Chapter 1 discusses the syntactic and semantic properties of coordinate structures and their constituting elements that is the coordinators and the coordinands they link Chapter 2 discusses the types of ellipsis known as conjunction reduction and gapping found in coordinate structures Chapter 3 discusses elements seemingly exhibiting coordination like properties such as dan than in comparative constructions like Jan is groter dan zij Jan is taller than she Cause, Condition, Concession, Contrast Elizabeth Couper-Kuhlen,Bernd Kortmann,2000 English today s most important international language is probably the best described and most widely studied language in linguistic research This is because there is an immense body of descriptive and theoretical publications and especially because of the existence of large computer corpora for Present Day English as well as for older periods of the language and for regional and social varieties The strength of current English linguistics therefore is its orientation to solid descriptive empirical research The future of English linguistics as envisaged by the editors of Topics TOPICS IN The Development of Dutch Connectives Jacqueline Evers-Vermeul,2005 Determination of Information and Tenor in Texts Luuk Lagerwerf,2003 **Language, Representation and Reasoning** Mixel Aurnague,2007 Current Contents Institute for Scientific Information (Philadelphia),2001 **Language** George Melville Bolling,Bernard Bloch,1999 Szemiotikai szövegtan ,2004 Sprache und Datenverarbeitung ,2003 **Verslagen en mededelingen van de Koninklijke Academie voor Nederlandse Taal- en Letterkunde** ,2008 *Bibliografie van de Nederlandse taal- en literatuurwetenschap* ,1999 Aangevuld met de bibliografie van de friese taal en literatuurwetenschap *Onze taal* ,1999 Rhetoric and Cognition Thierry Herman,Steve Oswald,2014 This volume gathers contributions from two disciplines which have much to gain from one another rhetoric and cognitive science as they both have much to say in the broad realm of argumentation studies This collection neither condemns the fallacious effects of specific argument schemes nor adds yet another layer to fallacy criticism but studies how argumentation and fallacies work

hic et nunc What are the linguistic and cognitive mechanisms behind the performance of fallacious arguments How do rhetorical strategies work at the interface of cognition language science and society
