**International News in the Digital Age** Judith Clarke, Michael Bromley, 2012-01-25 The new research presented in this volume suggests that general perceptions cultural psychological geographical allied to the customs and values of journalism and underpinned by the uses of technology significantly shape international news This gives rise to a blend of the old and the

new traditions of cultural centredness and innovative practices anchorages of place and the rootlessness of globalization Technology per se has not swept all before it On the other hand its uses have altered the means and methods of international news sourcing construction and dissemination Consequently the uptake of technology has contributed to fundamental changes in style and form and has greatly facilitated cross cultural exchanges The category international news is now more of a hybrid as recognized by the BBC and others The chapters in this book demonstrate that this hybridity is unevenly distributed across geo political domains and often across time Nevertheless as the contributors to this volume show the concept of international news relies on tightly interwoven elements of orthodox journalism social media civic expression and public assembly

**Technological Perspectives for Air Base Communications** Willis H. Ware,1985 This Note examines the relevance of contemporary local area network LAN and computer based digital telephone switch technology to the needs of CONUS airbases in both the near term and far term It suggests possible architectures based on such technology and concludes that in the next decade a hybrid arrangement will provide the flexibility and adaptability that differences in requirements among bases demand The Note also considers the security aspect of handling classified information in base level communications and concludes that security issues in a LAN oriented base will be awkward for several years ahead It suggests however that commonsense actions can be taken that will help make base communications more secure and describes several new National Security Agency sponsored programs that will make it possible to provide secure on base telephone and data communications It makes two major recommendations 1 that a policy statement be developed outlining the context assumptions and guidelines for improving base communications in the next decade and 2 that a comprehensive plan be drawn up to guide the Air Force on an evolutionary path to improved airbase communications Rand Abstracts     Traffic Engineering & Control ,2003     *People of Today* ,2002     **CIO.** ,2005-04
